Machine Intelligence A. Gomersall, 2013-03-14 In 1981 Robotics Bibliography was published containing over 1 800 references on industrial robot research and development culled from the scientific literature over the previous 12 years It was felt that sensors for use with industrial robots merited a section and accordingly just over 200 papers were included It is a sign of the increased research into sensors in production engineering that this bibliography on both the contact and non contact forms has appeared less than three years after that first comprehensive collection of references appeared In a review in 1975 Professor Warnecke of IPA Stuttgart drew attention to the lack of sensors for touch and vision Since then research workers in various companies universities and national laboratories in the USA the UK Italy Germany and Japan have concentrated on improving sensor capabilities particularly utilising vision artificial intelligence and pattern recognition principles As a result many research projects are on the brink of commercial exploitation and development This bibliography brings together the documentation on that research and development highlighting the advances made in vision systems but not neglecting the development of tactile sensors of various types No bibliography can ever be comprehensive but significant contributions from research workers and production engineers from the major industrialised countries over the last 12 years have been included *Robot Vision* Azriel Rosenfeld, Society of Photo-optical Instrumentation Engineers, 1982

Proceedings, 1990 *Selected Papers on Model-based Vision* Hatem N. Nasr, 1993 **Computer Vision** Rangachar Kasturi, Ramesh Jain, 1991 Together these books two volumes of Computer Vision Principles and Advances and Applications constitute a tutorial a guide to practical applications and a reference source on recent advances in computer vision research The tutorial component will benefit students and professionals who are relatively new to the computer vision field The description of practical applications of machine vision technology will act as a guide to practicing engineers And the collection of papers on recent research advances will be an excellent reference source for active researchers in the computer vision field We believe that the ideas and techniques described in these two books will continue to influence vision system research and design for many years to come Robot Vision Azriel Rosenfeld, 1982 *Robot Vision* Azriel (editor) Rosenfeld, SPIE (Society of Photo - Optical Instrumentation Engineers) - the International Society for, Optical Engineering, 1982 **Robot Vision (proc.
