A new breed of contemporary artist engages science and technology not just to adopt the vocabulary and gizmos but to explore and comment on the content, agendas and possibilities. Indeed, proposes Stephen Wilson, the role of the artist is not only to interpret and to spread scientific knowledge but to be an active partner in determining the direction of research. Years ago C. In this rich compendium, Wilson offers the first comprehensive survey of international artists who incorporate

concepts and research from mathematics the physical sciences biology kinetics telecommunications and experimental digital systems such as artificial intelligence and ubiquitous computing In addition to visual documentation and statements by the artists Wilson examines relevant art theoretical writings and explores emerging scientific and technological research likely to be culturally significant in the future He also provides lists of resources including organizations publications conferences museums research centers and Web sites
