**Fighters of the Dying Sun** Justo Miranda,2021-07-11 The first B 29 flew over Tokyo on 1 November 1944 It was a photographic reconnaissance aircraft ironically named Tokyo Rose The Ki 44 fighters of the 47th Sentai took off to intercept it but as it turned out the Superfortress flew at such an altitude and speed that they could not reach it The Ki 44 II Otsu had been specifically designed for this type of interception and could reach the astonishing rate of climb of 5 000 m in four minutes however it was not good enough During the following ten months a devastating bombing campaign of thousands of Superfortresses destroyed 67 Japanese cities and half of Tokyo The cultural shock and the political consequences were huge when it was realised that the Japanese industry was not able to produce the specially heat and stress resistant metallic alloys that were required to manufacture the turbo superchargers needed by the fighters in charge of defending the Japanese mainland They lacked the essential chromium and molybdenum metals to harden the steel This fact thwarted the

manufacturing of numerous advanced projects of both conventional fighters and those derived from the transfer of German technology fitted with turbojets and rocket engines They are thoroughly described in this book **Air Force Magazine**, 2004 **Wernher von Braun** Erik Bergaust, 2017-09-15 Here is Dr Wernher von Braun s incredible story from his early years in Germany where he gave birth to modern rocketry to his arrival in the United States and his launching of the first American satellite the first man on the moon and other stunning space exploration feats Every page of Wernher von Braun s life is a monument to the drama of adventure Few people have been fighting so hard and indeed very few have been subject to so much criticism so much jealousy so much defeat yet very few have lived to be honored and to harvest the fruits of so many wonderful victories as has this man Author Erik Bergaust has had the advantage of knowing von Braun as a friend hunting and fishing companion space business associate and biographer for more than twenty five years Thus he has been able to present a dramatic portrait of an important personality and a 20th century hero **Naval Aviation News**, 1994
