Wild Animals of the Rockies J Peterson, James Pershing Gilligan, 2019-07-17 Among the frequent questions by visitors to

the Rocky Mountain region are those pertaining to the wild animals What animals are found here How can they be identified What are the wildlife problems of the high country These are common queries which this booklet attempts to answer The author a former ranger naturalist in Rocky Mountain National Park discovered through a visitor study in 1948 that a predominating interest of vacationers was in the wildlife of the area Therefore the writing has been limited to brief descriptions of the four footed animals as they are seen in nature with some explanation of their habits and habitat so they may be more readily located The cover tracks and identification plates further this intent Many find it difficult to understand why they cannot see more animals in this rugged country These animals are wild in the strictest sense Many are nocturnal in habit hiding during daylight and others must be approached very cautiously One satisfactory method of observing wildlife is to select a spot off the beaten trails and sit quietly for several hours allowing animal life to move about in a normal manner A secondary purpose of this booklet is to provide a checklist of all mammals known to use the National Park Not all species listed have been collected in the area It is hoped this will be a start toward providing an accurate more substantial and growing list of mammals for the Park The scientific names of the 50 species given conform to all revisions to date
