Inventing Baby Food Amy Bentley, 2014-09-19 Food consumption is a significant and complex social activity and what a society chooses to feed its children reveals much about its tastes and ideas regarding health In this groundbreaking historical work Amy Bentley explores how the invention of commercial baby food shaped American notions of infancy and influenced the evolution of parental and pediatric care Until the late nineteenth century infants were almost exclusively fed breast milk But over the course of a few short decades Americans began feeding their babies formula and solid foods frequently as early as a few weeks after birth By the 1950s commercial baby food had become emblematic of all things modern in postwar America Little jars of baby food were thought to resolve a multitude of problems in the domestic sphere they reduced parental anxieties about nutrition and health they made caretakers feel empowered and they offered women entering the workforce an irresistible convenience But these baby food products laden with sugar salt and starch also became a gateway to the industrialized diet that blossomed during this period Today baby food continues to be shaped by medical commercial and parenting trends Baby food producers now contend with health and nutrition problems as well as the rise of alternative food

movements All of this matters because as the author suggests it s during infancy that American palates become acclimated to tastes and textures including those of highly processed minimally nutritious and calorie dense industrial food products

*Building Nature's Market* Laura J. Miller,2017-11-22 For the first 150 years of their existence natural foods were consumed primarily by body builders hippies religious sects and believers in nature cure And those consumers were dismissed by the medical establishment and food producers as kooks faddists and dangerous quacks In the 1980s broader support for natural foods took hold and the past fifteen years have seen an explosion everything from healthy eating superstores to mainstream institutions like hospitals schools and workplace cafeterias advertising their fresh from the garden ingredients Building Nature s Market shows how the meaning of natural foods was transformed as they changed from a culturally marginal religiously inspired set of ideas and practices valorizing asceticism to a bohemian lifestyle to a mainstream consumer choice Laura J Miller argues that the key to understanding this transformation is to recognize the leadership of the natural foods industry Rather than a simple tale of cooptation by market forces Miller contends the participation of business interests encouraged the natural foods movement to be guided by a radical skepticism of established cultural authority She challenges assumptions that private enterprise is always aligned with social elites instead arguing that profit minded entities can make common cause with and even lead citizens in advocating for broad based social and cultural change **History of the Soyfoods Movement Worldwide (1960s-2019)** William Shurtleff; Akiko
