**Design and Politics** Katarina Serulus, 2018-10-08 The unique position of design in the political context of postwar Belgium In the postwar era design became important as a marker of modernity and progress at world fairs and international exhibitions and in the global markets The Belgian state took a special interest in this vanguard phenomenon of industrial design as a vital political and economic strategic tool in the context of the Cold War and the creation of the European community This book describes the unique position that design occupied in the political context of postwar Belgium as it analyses the public promotion of design between 1950 and 1986 It traces this process from the first government backed manifestations and institutions in the 1950s through the 1960s and 1970s until design lost its privileged position as a state backed institution a process which culminated in the closure of the Brussels Design Centre in 1986 in the midst of the Belgian federalisation process A key figure in this history is the policymaker Josine des Cressonnières who played a leading role in the national and international design community and succeeded in connecting very different political worlds through the medium of design *Roger Tallon*, 1994

**Going Real: The Value of Design in the Era of PostCapitalism** Giovanni Innella, Marco Petroni, 2019-10-31 In the age of post capitalism what is the value of design Is value defined by economic potential Or is it something far less tangible Now more than ever design has the ability to engage us in economic political and cultural debate to actively resist the monotony of daily life and to counteract the precarious situation on which modern society seems to rest Positioning itself as a lens through which to view the world design allows us and in some cases even forces us to reflect on the many aspects of the societies in which we live Divided into three chapters GOING REAL positions itself in relation to the works of Marc Jongen Maurizio Lazzarato Adam Greenfield and Tiziana Terranova among others However unlike the abovementioned authors this book draws on the works of selected designers and artists to reflect on the economic political and cultural aspects of our post capitalist societies Beginning with an in depth case study of Detroit during the downfall of the industrial era this volume moves on to a timely and provocative insight into the human crises surrounding current migration trends with a particular focus on Calais Finally in the third chapter the human body itself is laid bare as the authors analyse how and why the most personal of spaces became not only the ultimate marketplace for businesses but also an object of control for governments

*Paris and the Cliché of History* Catherine E. Clark, 2018-07-19 This book turns a compelling new lens on thinking about the history of Paris and photography The invention of photography changed how history could be written But the now commonplace assumptions that photographs capture fragments of lost time or present emotional gateways to the past that structure today s understandings did not emerge whole cloth in 1839 Focusing on one of photography s birthplaces Paris and the Cliché of History tells the story of how photographs came to be

imagined as documents of the past Author Catherine E Clark analyzes photography's effects on historical interpretation by examining the formation of Paris's first photo archives at the Musée Carnavalet and the city's municipal library their use in illustrated history books and historical exhibitions and reconstructions such as the 1951 celebration of Paris's 2000th birthday and the public's contribution to the historical record in amateur photo contests Despite the photograph's growing importance in these forums it did not simply replace older forms of illustration visual documentation or written text Photos worked in complex and shifting relation to other types of pictures as photographers popular historians and publishers built on the traditions and iconography of painting and engraving in order to both document the past scientifically and objectively and to reconstruct it romantically In doing so they not only influenced how Parisians thought about the city's past and how they pictured it they also ensured that these images shaped how Parisians lived their own lives especially in deeply charged moments such as the Liberation after World War II This history of picturing Paris does not simply reflect the city's history it is Parisian history

Twemlow,2017-05-19 How product design criticism has rescued some products from the trash and consigned others to the landfill Product design criticism operates at the very brink of the landfill site salvaging some products with praise but consigning others to its depths through condemnation or indifference When a designed product s usefulness is past the public happily discards it to make room for the next new thing Criticism rarely deals with how a product might be used or not used over time it is more likely to play the enabler encouraging our addiction to consumption With *Sifting the Trash* Alice Twemlow offers an especially timely reexamination of the history of product design criticism through the metaphors and actualities of the product as imminent junk and the consumer as junkie Twemlow explores five key moments over the past sixty years of product design criticism From the mid 1950s through the 1960s for example critics including Reyner Banham Deborah Allen and Richard Hamilton wrote about the ways people actually used design and invented a new kind of criticism At the 1970 International Design Conference in Aspen environmental activists protested the design establishment s lack of political engagement In the 1980s left leaning cultural critics introduced ideology to British design criticism In the 1990s dueling London exhibits offered alternative views of contemporary design And in the early 2000s professional critics were challenged by energetic design bloggers Through the years Twemlow shows critics either sifted the trash and assigned value or attempted to detect diagnose and treat the sickness of a consumer society      Hidden Paris Caroline

**Opening the Gates** Donald Reid, 2018-06-12 How the occupation of a watch factory became one of the iconic labor struggles after May 1968 In 1973 faced with massive layoffs workers at the legendary Lip watch firm in Besan on France occupied their factory to demand that no one lose their job They seized watches and watch parts assembled and sold watches and paid their own salaries Their actions recaptured the ideals of May 1968 when 11 million workers had gone on strike to demand greater autonomy and to overturn the status quo Educated by 68 the men and women at the Besan on factory formed committees to control every aspect of what became a national struggle Female employees developed a working class feminism combating workplace sexual harassment and male control of the union The endurance of the Lip movement and its appeal through the 1970s came from its rich democratic participatory culture The factory workers welcomed supporters and engaged with them an expression of solidarity between blue collar and student activists that built on the legacy of 1968 *Opening the Gates The Lip Affair 1968 1981* is the first account of all facets of the experience drawing extensively on unpublished materials to reconstruct the vision and practice of those involved The Lip workers struggle was the last widespread expression in France of the belief that creativity and moral autonomy are the driving force of social transformation It brought about what Sartre called the extension of the field of possibilities not just for workers but for all those who gave the movement support and meaning

*Future Transport in Cities* Brian Richards, 2012-09-10 Cities around the world are being wrecked by the ever increasing burden of traffic A significant part of the problem is the enduring popularity of the private car still an attractive and convenient option to many who turn a blind eye to the environmental and public health impact Public transport has always seemed to take second place to the car and yet alternative ways of moving around cities are possible Measures to improve public transport as well as initiatives to encourage walking and cycling have been introduced in many large cities to decrease car use or at least persuade people to use their cars in different ways This book explores many of the measures being tried It takes the best examples from around the world and illustrates the work of those architects and urban planners who have produced some of the most significant models of transport architecture and city planning The book examines the ways in which new systems are evolving and how these are being integrated into the

urban environment It suggests a future where it could be mandatory to provide systems of horizontal movement within large scale development using the analogy of the lift upon which every high rise building depends In so doing future cities could evolve without dependence on the private car      Market Mediations B. Heilbrunn, 2015-05-11 Market Mediations offers a fresh way to look at consumption practices design and branding issues through analysis based on the French and European intellectual tradition To account for this vast system of objects and brands the book draws on the generative trajectory of meaning stemming from the structural semiotics of Greimas obedience
