Cable Television Felix Chin,1978-04-01 The rapid expansion of the cable television industry during the past 25 years has stimulated an almost equally rapid increase in the volume of cable television literature being produced each year Moreover the rate of growth of the number of publications is increasing of about 7000 articles studies and reports on cable TV published between 1950 and 1977 more than 5000 appeared in print after 1965 Needless to say the quality and subject areas of all this material vary widely as do the range of treatment and degree of detail that characterize different publications Because the array of information and sources available is so vast and because the usefulness of the published material is not uniformly high this bibliography while truly comprehensive in the range of topics covered aims at judicious selection rather than completeness I have attempted to provide the reader with all the best material ever published on any topic related to one of the most active areas of broadcasting cable television The first section of the bibliography lists general reference materials such as cable television periodicals including publishers names and addresses and cable television indexes to periodicals and legal digests The main body of the bibliography contains annotated citations arranged by topic under the following seven categories general information and history cable television regulation and policy cable technology and channel capacity cable television finance and economics uses of cable television cable television and education and community control and franchises

**The FCC and the Politics of Cable TV Regulation, 1952-1980** Michael J. Zarkin,2010 While other studies have examined the history of cable television regulation none has fully explained why the FCC struggled to develop regulations during its formative years In this study Michael Zarkin helps fill this gap by providing such an explanation through an application of organizational learning theory Zarkin argues that in order for the FCC to formulate regulations for a brand new communications medium it first needed develop and effectively utilize the capacity to gather and analyze policy relevant knowledge By the 1970s conditions were ripe for this to happen and the FCC was able to more effectively revise its cable television policies This book elaborates and applies an organizational learning framework that contributes to our understanding of how regulatory agencies operate By employing a broad range of published and unpublished primary sources the book also succeeds in providing a more detailed and penetrating study of cable television than previous endeavors Rather than simply summarizing and critiquing policy decisions the book paints a picture of the people ideas and politics that shaped cable television regulation during these formative years The FCC and the Politics of Cable TV Regulation 1952 1980 will be of interest to scholars who study regulatory agencies the policy process and communications law and policy
