Role Of Design In The Furniture Industry:

The Role of Design in the Furniture Industry AKTRIN Research Institute, Lorraine Tierney, 1995 **The Role of Design in the Furniture Industry** Lorraine Tierney, 1995 **Local Knowledge Through the Integration of Design and Perspectives of Visual and Performing Arts** Ahmad Zuhairi Abdul Majid, A.S. Hardy Shafii, Local knowledge plays a key role in sustainable practices in the realm of design from various fields such as visual and performing arts. This book of 11 chapters deals with indigenous knowledge and local wisdom related closely to the contemporary issues of these two important fields which interconnected and complement each other. This book mainly discusses the visual language of local genius on art installation, the prototype model script reproduction tool and the designer role in furniture industry. Another interesting aspect presented in this book is the integration of psychology in the applicability of sound art as the therapy for Alzheimer's patients and exploring the realm of meanings and symbols in music and dance movements. This book also highlights on how indigenous knowledge is crucial in enhancing religion relationships through dance and the implementation of an appropriate technology via Kinect based tracking in performing arts. This book is definitely a reference for researchers, academicians and students especially from the field of visual design and performing arts and those who are interested in investigating and learning the local knowledge in a wider spectrum not only for local context but also in other cultures.

History of Design and Design Law Tsukasa Aso, Christoph Rademacher, Jonathan Dobinson, 2022-04-22. For the first time this book provides an up to date history of product design and product design law covering 17 countries: Japan, Korea, China, Singapore, the United Kingdom, Germany, France, Italy, the Nordic countries, Denmark, Finland, Iceland, Norway and Sweden, Russia, the United States, Brazil and Australia, selected for their innovative or influential approach to design or design protection. Each country is the subject of two chapters: one on the history of design and the other on the history of design law, authored by experts in design and intellectual property/IP law. This unique interdisciplinary approach explains why and how various national design protection systems that can include design copyright, trade mark, competition and civil laws developed, making it an ideal book for students, researchers and lawyers. The book also serves as an international survey of different national policy and legal responses to historical developments and specific design and legal issues, allowing readers to consider their advantages and disadvantages and so is also recommended for policy and law makers as well as organizations that administer IP rights. Topics include the subject matter of design protection, procedural and substantive requirements, design registration, infringement and the overlap of design rights and other IP rights. The chapters on design history provide further context to the historical development of these legal concepts by considering major design movements, key designers and iconic designs and the current state of design. The chapters highlight the connected and often complementary relationship between the two histories not only for each country but at the regional and international level, often as a result of government policies, trade, colonialism, immigration and globalisation. Design and design practice continue to become more

global and evolve with developments in technology At the same time design laws are not internationally harmonized and continue to develop at the national level with a number of significant changes occurring in recent years This timely book shows how the lessons of the past continue to inform the future direction of design and the legal systems developed to protect it

that no interior designer can afford to be without *Advances in Manufacturing III* Justyna Trojanowska, Agnieszka Kujawińska, Jose Machado, Ivan Pavlenko, 2022-03-25 This book reports on cutting edge research and technology aimed at increasing the efficiency of production processes and to foster the implementation of Industry 4.0 solutions in manufacturing. Gathering peer review contributions to the 7th International Scientific Technical Conference MANUFACTURING 2022 held in Poznan Poland on May 16-19 2022 it describes advanced engineering methods to optimize different stages and aspects of the production process including product design production scheduling equipment maintenance and safety. It discusses the applications of augmented virtual and mixed reality within the manufacturing industry and for education and training purposes and highlights cutting edge solutions for green and sustainable production. Offering a timely practice oriented reference guide for both researchers and practitioners in manufacturing this book is also intended to contribute bridging the gap between university and industry fostering a closer communication and cooperation between them. *Rethinking Plastics in Product Design* Geoff Isaac, 2025-03-06 This book addresses the urgent need to reduce our use of virgin fossil plastics. It provides a framework for designers and manufacturers to re-evaluate their use of plastics and promotes the use of alternative materials with lower environmental impacts. Lightweight strong and cheap plastics are often the obvious choice when designing consumer durables but their use is resulting in devastating health and environmental consequences. Recycled plastics and bioplastics are often suitable replacements however mechanical and aesthetic differences mean working with these materials is often challenging and expensive. In this book Geoff Isaac outlines strategies for developing more environmentally friendly design solutions and provides practical guidance for designers who seek to use plastics more sustainably. Chapters include case studies selected from sixty chairs made from renewable plastics as chairs are often developed to showcase the potential of new materials and their suitability for applications across other consumer products. The book also features interviews with a range of industry representatives and international designers including Philippe Starck Barber Osgerby Konstantin Grcic Bertjan Pot and Karim Rashid to illustrate recent designs using renewable plastics. This book provides an empowering blueprint for designers to make environmentally responsible decisions in today's business landscape. *Informatics and Management Science II* Wenjiang Du, 2012-12-03 The International Conference on Informatics and Management Science IMS 2012 will be held on November 16-19 2012 in Chongqing China which is organized by Chongqing Normal University Chongqing University Shanghai Jiao Tong University Nanyang Technological University University of Michigan Chongqing University of Arts and Sciences and sponsored by National Natural Science Foundation of China NSFC. Resilience of Luxury Companies in Times of Change Gabriella Lojacono, Laura Ru Yun Pan, 2021-08-23 Why do some luxury companies remain resilient through times of change while others do not The reason is that these companies have unique skills to diversify their revenue generation by being ambidextrous Luxury companies today cannot depend on their reputation or their creativity alone to remain resilient rather they require the ability to be ambidextrous to explore new trajectories for future growth and exploiting their iconic values In past decades the industry has shifted from product to customer centric and forced companies to adopt new strategies and approaches to succeed This includes the adoption of digital platforms such as ecommerce social media and mobile enabled tools to continually elevate customer experience In addition new business models have emerged to address growing pains particularly in inventory issues over manufacturing and sustainability Brands today are forced to adopt evolution through innovation that is anchored by new values without compromising their DNA Based on in depth research and interviews with CEOs from leading luxury companies Lojacono and Pan show how companies can hedge their risks and remain resilient in times of change Design Management Brigitte
