Integrated Optics: Theory and Technology Robert G. Hunsperger, 2013-11-11 Our intent in producing this book was to provide a text that would be comprehensive enough for an introductory course in integrated optics yet concise enough in its mathematical derivations to be easily readable by a practicing engineer who desires an overview of the field The response to the first edition has indeed been gratifying unusually strong demand has caused it to be sold out during the initial year of publication thus providing us with an early opportunity to produce this updated and improved second edition This development is fortunate because integrated optics is a very rapidly progressing field with significant new research being regularly reported Hence a new chapter Chap 17 has been added to review recent progress and to provide numerous additional references to the relevant technical literature Also thirty five new problems for practice have been included to supplement those at the ends of chapters in the first edition Chapters I through 16 are essentially unchanged except for brief updating revisions and corrections of typographical errors Because of the time limitations imposed by the need to provide an uninterrupted supply of this book to those using it as a course text it has been possible to include new references and to briefly describe recent developments only in Chapter 17 However we hope to provide details of this continuing progress in a future edition **Trusting the Gold** Tara Brach, 2021-06-15 A beautifully illustrated gift book to help us uncover and trust the innate goodness in ourselves and others We receive so many messages from our culture meant to divide us from one another or turn us against ourselves Yet when we stop judging stop avoiding stop trying to resist that which makes us afraid or ashamed we open to our true nature a boundless field of awareness that is innately fearless and loving This recognition of our essential human goodness may be the most radical act of healing we can take The gold of our true nature can never be tarnished says Tara Brach In the moments of remembering and trusting this basic goodness of our Being we open to happiness peace and freedom In *Trusting the Gold* Tara draws from more than four decades of experience as a meditation teacher and psychologist to share her most valuable practices for reconnecting with the beauty of our humanity from timeless Buddhist wisdom to techniques adapted to the specific challenges of our modern age Here you ll explore three
