Over the past twenty years and in step with the contemporary shift toward trans-disciplinarity, Media Studies has rapidly developed a very significant body of theory and evidence. Media Studies is here to stay and scholars in the discipline have a vital contribution to make. The SAGE Handbook of Media Studies surveys and evaluates the theories, practices and future of the field. Editor John Downing and associate editors Denis McQuail, Philip Schlesinger and Ellen Wartella have brought together a team of international contributors to provide a varied critical analysis of this intensely interesting field of study. The Handbook offers a comprehensive review within five interconnected areas: humanistic and social scientific approaches, global and comparative perspectives, the relation of media to economy and power, media users and elements in the media mosaic ranging from media ethics to advertising, from popular music to digital technologies and from Hollywood and Bollywood to alternative media. The contributors to The Handbook are from Australia, Austria, Britain, Canada, France, Guatemala, India, Japan, the Netherlands, South Korea and the United States. Language Ideologies and the Globalization of 'Standard' Spanish Darren

Paffey, 2012-09-06 This book examines how language ideologies are manifested in newspaper media. Using the Spanish press as a case study, it considers how media discourse both from and about the Real Academia Española constitutes a set of language ideological debates in which the institution represents a vision of what the Spanish language is and what it should be like. Paffey adopts a Critical Discourse Analysis approach to a large corpus of texts from Spain's best-selling daily newspapers, *El País* and *ABC*. More generally, the book sheds light on how institutions produce and maintain visions of standard language in the contemporary context. A global language such as Spanish is by nature more widely used outside of the nation-state in question than in it. The book covers recent research on language ideologies, standardization, and CDA and considers the application of these to three core discursive themes: language unity and a concept of a panhispanic speech community; the RAE's construction of its authority and institutional ideologies; and management of language on a global scale.
