Paul C. Vitz

Psychology Of Atheism:

Faith of the Fatherless Paul C. Vitz, 2013-09-10 In this updated expanded edition starting with Freud's projection theory of religion that belief in God is merely a product of man's desire for security Professor Vitz argues that psychoanalysis actually provides a more satisfying explanation for atheism Disappointment in one's earthly father whether through death absence or mistreatment frequently leads to a rejection of God A biographical survey of influential atheists of the past four centuries shows that this defective father hypothesis provides a consistent explanation of the intense atheism of these thinkers A survey of the leading defenders of Christianity over the same period confirms the hypothesis finding few defective fathers Vitz concludes with an intriguing comparison of male and female atheists and a consideration of other psychological factors that can contribute to atheism Professor Vitz does not argue that atheism is psychologically determined Each man whatever his experiences ultimately chooses to accept God or reject him Yet the cavalier attribution of religious faith to irrational psychological needs is so prevalent that an exposition of the psychological factors predisposing one to atheism is necessary

The Psychology of Atheism Robert Charles Sproul, 1974 [If There is a God, why are There Atheists?](#) Robert Charles Sproul, 1974-01-01 **Adieu to God** Mick Power, 2012-01-06 Adieu to God examines atheism from a psychological perspective and reveals how religious phenomena and beliefs are psychological rather than supernatural in origin Answers the psychological question of why in the face of overwhelming scientific evidence to the contrary do religions continue to prosper Looks at atheism and religion using a fair and balanced approach based on the latest work in psychology sociology anthropology psychiatry and medicine Acknowledges the many psychological benefits of religion while still questioning the validity of its supernatural belief systems and providing atheist alternatives to a fulfilling life [Losing Our Religion](#) Will M. Gervais, 2024-06-18 Does God exist This straightforward question has spawned endless debate ranging from apologists supposed proofs of God's existence to New Atheist manifestos declaring belief in God a harmful delusion Disbelief peels back the curtains on this debate and uses cutting edge science to tell the story of how atheism arises and spreads in our uniquely religious species It's undeniable that religion is a core tenet of human nature It is also true that our overwhelmingly religious species is also as atheistic as it's ever been Yet no scientific understanding of religion is complete without accounting for those who actively do not believe In this refreshing book Will M Gervais PhD a global leader in the psychological study of atheism shows that the ubiquity of religious belief and the peculiarities of atheism are connected pieces in the puzzle of human nature By examining how atheism comes to be in our religious species Gervais offers new insights on belief and morality Disbelief provides a radically cohesive theory of both faith and atheism showing how we became a uniquely and universally religious species and why many are now abandoning their belief Through a firsthand account of breakthroughs in the scientific study of atheism including key findings from cognitive developmental and evolutionary psychology this book forces a rethinking of the prevailing theories of religion and reminds both believers and

atheists of the shared psychologies that set them on their distinct religious trajectories Disbelief explains how we became religious why we re leaving faith behind and how we can get along with others across the religious divides we ve culturally evolved if there is a God, why are there atheists? : a surprising look at the psychology of atheism R. C. Sproul,1974

Atheist Personality Disorder John J. Pasquini,2009-06 Fr Pasquini s work puts to death the intellectual hopes for atheism and brings to light the mental disorder behind the atheist mindset With the advances in molecular biology cosmic mathematics and the psychology of atheism atheism has lost its intellectual validity being more the product of a psychological disorder whose origins are found in childhood development **Psychology as Religion** Paul C. Vitz,1994 This is a virtually rewritten second edition of New York University Professor Paul Vitz s profoundly important analysis of modern psychology Vitz maintains that psychology in our day has become a religion a secular cult of self and has become part of the problem of modern life rather than part of its resolution **On God's Existence** John J. Pasquini,2016-05-02 Philosophy and the advances in cosmology neurology molecular biology and the social sciences have made the convincing and converging arguments for God s existence more probable than ever in history On God s Existence is concise summary of these arguments as well as new arguments inspired by the advances of the sciences **Christian Apologetics** Douglas Groothuis,2022-02-08 The Christian faith offers people hope But how can we know that Christianity is true How can Christians confidently present their beliefs in the face of doubts and competing views In this second edition of a landmark apologetics text Douglas Groothuis makes a clear and rigorous case for Christian theism addressing the most common questions and objections raised regarding Christianity **The Existence of God** John J. Pasquini,2009-12-08 The Existence of God is an affirmation of faith in God and a warning of the dangers of a world guided by the religion of atheism This book warns against a religion based upon chance deficient science and deficient atheistic evolution as opposed to theistic evolution Modern advances in molecular biology cosmic mathematics and the psychology of atheism have vanquished atheism s intellectual and psychological raison d tre In one of history s great ironies the birth of the New Atheism has brought about the beginning of the end of atheism as a legitimate intellectual position **The Naturalness of Belief** Charles Taliaferro,Paul Copan,2018-11-13 Despite its name naturalism as a world view turns out to be rather unnatural in its strict and more consistent form of materialism and determinism This is why a number of naturalists opt for a broadened version that includes objective moral values intrinsic human dignity consciousness beauty personal agency and the like But in doing so broad naturalism begins to look more like theism As many strict naturalists recognize broad naturalism must borrow from the metaphysical resources of a theistic world view in which such features are very natural common sensical and quite at home in a theistic framework The Naturalness of Belief begins with a naturalistic philosopher s own perspective of naturalism and naturalness The remaining chapters take a multifaceted approach in showing theism s naturalness and greater explanatory power They examine not only rational reasons for theism s ability to account for consciousness

intentionality beauty human dignity free will rationality and knowledge they also look at common sensical existential psychological and cultural reasons in addition to the insights of the cognitive science of religion
