[Advances in Radiation](#)

Oncology in Lung Cancer Branislav Jeremić, 2023-08-14 This is the third completely updated edition of a comprehensive book in which many of the world's leading lung cancer specialists discuss the recent advances in the radiation oncology of lung cancer and reflect on the latest research findings in lung cancer and other intrathoracic malignancies. Lung cancer remains the major cancer killer in both sexes worldwide. It is so despite significant progress in recent decades in both diagnostic and treatment approaches. New biological and technological advances in this field are now faster incorporated in the overall decision making process and are bringing fast and substantial improvements in both survivals and quality of life of lung cancer patients. Optimized patient oriented approaches are reality of the third decade of this millennium and thoracic oncologists strive towards nothing but seamlessly delivering it in a continuous battle with lung cancer. The first three sections of the work cover the basic science of lung cancer clinical investigations including histology and staging and a wide range of fundamental treatment considerations. Current treatment strategies for small cell and non small cell lung cancer as well as other intrathoracic malignancies are then explained and evaluated in detail with due attention to novel approaches that promise further improvements in outcome. The various types of treatment related toxicity are discussed and quality of life studies and prognostic factors are also considered. After evaluating the latest technological and biological advances including stereotactic radiotherapy and particle therapy the book concludes by thorough consideration of specific aspects of clinical research in lung cancer. This concise yet comprehensive book is an invaluable resource for radiation oncologists.

Radiation Protection In The Health Sciences (With Problem Solutions Manual) (2nd Edition) Marilyn E Noz, Gerald Q Maguire Jr, 2007-04-12 This book takes a very practical approach to radiation protection and presents very readable information for anyone working in the radiation field or with radioactive material. Offering information rarely found elsewhere the authors describe in detail both the basic principles and practical implementation recommendations of radiation protection. Each chapter includes self assessment review questions and problems with answers provided to help readers master important information. Coupled with a teacher's manual this book is highly suitable as an undergraduate text for students preparing for careers as X ray radiation oncology or nuclear medicine technologists. It can also be used as a reference for residents in radiology and radiation oncology medical personnel or anyone working with radioactive materials such as those involved in homeland security emergency services or employed at a nuclear power plant. *Molecular Biomarkers for Gastric Cancer, 2nd edition* Kecheng Zhang, Seungwan Ryu, Fenglin Liu, 2024-07-31 Gastric cancer (GC) represents a serious health problem on a global scale. Despite some recent advances in the field the prognosis in GC remains poor. A better understanding of molecular biology which would lead to improved treatment options is needed. Many potential biomarkers of prognostic significance have been identified. However inhibition of only HER2 protein has led to a modest survival benefit. A deeper understanding of the pathogenesis and biological features of gastric cancer including the identification and characterization of diagnostic prognostic predictive and therapeutic biomarkers hopefully will provide

improved clinical outcomes This Research Topic aims to provide a comprehensive overview on recent progress in emerging molecular biomarkers for gastric cancer We welcome the submission of Review and Original Research articles covering but not limited to the following topics 1 Novel diagnostic molecules to improve the early detection rate for gastric cancer 2 Novel prognostic molecules to stratify gastric cancer patients into different risk 3 Novel therapeutic biomarker which could serve as target for treating gastric cancer 4 Novel biomarker to predict chemotherapy response of gastric cancer patients
