## **Radiation Safety In Nuclear Medicine:**

Radiation Safety Guide for Nuclear Medicine Professionals Pankaj Tandon, Dibya Prakash, Subhash Chand Kheruka, Nagesh N Bhat, 2022-11-15 The book covers all the radiation safety aspects while working with unsealed radionuclides. Radiation safety plays a significant role in routine nuclear medicine practices and is necessary to protect occupational workers, patients, members of the general public and the environment. A fair knowledge of radiation safety is expected from all nuclear medicine professionals. Chapters include basics of radiation physics, biological bases of radiation protection, planning and design of nuclear medicine facilities, cyclotron and high dose therapy facilities, radiation safety considerations in nuclear medicine, cyclotron while preparing radiopharmaceuticals. It also includes the working mechanism of radiation detectors, quality assurance of positron emission tomography (PET) and gamma camera including single photon emission computed tomography (SPECT), emergency preparedness plan, nuclear medicine and CT dosimetry, transport regulations, the role of national regulatory authorities and radioactive waste management. The last chapter provides probable model questions asked in the radiological safety officer certification examination and includes 250 multiple choice questions, MCQs, 100 true or false, 60 fill in the blanks and 40 match the following questions. The book is written in a simple language for a better understanding of the occupational workers of any grade. It serves as reference material for nuclear medicine professionals on radiation safety related to planning, quality assurance, dosimetry and various regulations pertaining to nuclear medicine. It is a ready reckoner for the students pursuing a degree/diploma in nuclear medicine and preparing for certification courses in radiation safety to understand the subject matter along with options to attempt practice questions.

**Radiation Safety in Nuclear Medicine** Vincent J. Sodd, 1981      **Radiation Safety in Nuclear Medicine** Max H. Lombardi, 2006-10-20 Recent advances in the field of nuclear medicine (NM) are expanding the role and responsibilities of the nuclear medicine technologist (NMT) to include more complex and detailed tasks. New technologies are making the diagnosis, management and treatment of illnesses more sensitive, more specific, more accurate and ultimately safer for both the patient and the staff.

Radiation Safety in Nuclear Medicine Gopal B. Saha, 2023 This new edition is a fully updated guide to radiation safety practice for nuclear medicine professionals and assists the nuclear medicine technologists in taking their board certifying examination. The NRC requires the appointment of a radiation safety officer (RSO) or an associate radiation safety officer (ARSO) for different uses of radioactive material. Board certified nuclear medicine technologists are eligible to be RSO and ARSO in specific uses of radioactive material after successfully completing a 40 hr or 200 hr course on radiation safety depending on the type of RAM use. This book covers all subject materials in these courses on radiation safety. This guide provides ready made handy information on radiation safety as required in the practice of nuclear medicine presented in a concise form for easy understanding and quick reference related to a given situation and/or incident. The major change in the new edition of the book is the addition of questions at the end of each chapter to ensure the comprehension of the material.

by the examinees taking their certifying board examinations As mentioned in the first edition the NRC 10CFR20 for Standards for Radiation Protection and the NRC 10CFR35 for Medical Uses of Radioactive Materials are the primary sources of practical information on radiation safety in nuclear medicine Much of the information is still valid but many changes and additions have also been made since which are fully updated here This is an ideal reference for nuclear medicine physicians nuclear medicine technologists and researchers using radioactive materials

Applying Radiation Safety Standards in Nuclear Medicine International Atomic Energy Agency, 2005 This report is intended to be of assistance to both regulators and users of radiation sources in nuclear medicine applying the International Basic Safety Standards for Protection against Ionizing Radiation and for the Safety of Radiation Sources BSS Regulators will find it useful for reviewing applications for authorization and for inspection Users of radiation in nuclear medicine may follow the guidance provided in order to comply with the BSS requirements or the equivalent national requirements
