Radiative Heat Exchange In The Atmospher:

Radiative Heat Exchange in the Atmosphere K. Ya. Kondrat'Yev, 2013-09-03 Radiative Heat Exchange in the Atmosphere analyzes the concerns in thermal radiation and the radiation balance of the earth's surface and of the atmosphere The text first covers the basic definitions and concepts and then proceeds to discussing the development of basic theories of actinometric measurements of thermal radiation fluxes Next the selection deals with the absorption of long wave radiation in the atmosphere In the fourth chapter the title covers the solution of the problem of radiative heat transfer in the atmosphere Chapter 5 details the examination of the approximate methods of calculation of thermal radiation fluxes while Chapter 6 discusses the problem of the atmosphere and the net radiation at the ground The seventh chapter tackles the radiation balance and the last chapter covers the features of the methods and the results of calculating temperature changes caused by radiation The book will be of great use to researchers and practitioners of astrophysics and meteorology Ecologists and other environmental scientist will also benefit from the text

Radiative Heat Transfer During Atmosphere Entry at Parabolic Velocity Kenneth K. Yoshikawa, Bradford H. Wick, 1961 Stagnation point radiative heating rates for manned vehicles entering the earth's atmosphere at parabolic velocity are presented and compared with corresponding laminar convective heating rates The calculations were made for both nonlifting and lifting entry trajectories for vehicles of varying nose radius weight to area ratio and drag It is concluded from the results presented that radiative heating will be important for the entry conditions
