### **Thinking About Schools**

Aimee Howley, Craig Howley, 2012-11-12 As its title implies this book has a deceptively simple mission to prepare would be school leaders to draw upon a variety of theoretical perspectives when thinking about schools and schooling It shows how theories can function as cognitive tools to be mastered carefully stored in one s intellectual toolbox and used to interpret and resolve real world problems Beneath this goal lies the belief that the most effective leaders are those who are able to construct their own well grounded interpretations of events and their own responses to those events Key features of this exciting new text include the following Focus on Alternative Theories The functionalist theoretical views that have dominated administrator preparation programs for the last half century are reviewed early in the book and are shown to be inadequate to the task of understanding and coping with the complex realities of modern day schooling The remainder of the book presents alternative views of schooling that taken together can be thought of as a theoretical repertoire from which to construct interpretations and solutions to everyday real world problems Focus on Diversity Diversity is examined from a variety of viewpoints Chapter 6 looks at the cultural bases of leadership Chapter 7 at comparative and international contexts and Chapter 8 at gender and sexual orientation Illustrative Cases Each chapter contains a case with an embedded dilemma similar to those that real world administrators confront While illustrating the particular theoretical view presented in the chapter these cases are sufficiently complex that they lend themselves to interpretation by any of the other theories considered in the book This book is appropriate for graduate level courses with titles such as Organizational Theory Theory of School Leadership or Introduction to Educational Administration It might also be used as one of several texts in advanced courses on leadership theory     Architecture of Schools: The New Learning Environments Mark Dudek, 2012-09-10 This is the standard design guide on schools architecture providing vital information on school architecture Mark Dudek views school building design as a particularly specialised field encompassing ever changing educational theories the subtle spatial and psychological requirements of growing children and practical issues that are unique to these types of building He explores the functional requirements of individual spaces such as classrooms and shows how their incorporation within a single institution area are a defining characteristic of the effective educational environment Acoustics impact damage the functional differentiation of spaces such as classrooms music rooms craft activities and gymnasium within a single institution are all dealt with More esoteric factors such as the effects on behaviour of colour light surface texture and imagery are

considered in addition to the more practical aspects of designing for comfort and health Chapter 4 comprises 20 case studies which address those issues important in the creation of modern school settings They are state of the art examples from all parts of the world These examples include Pokstown Down Primary Bournemouth Haute Vallee School Jersey Heinz Galinski School Berlin Anne Frank School Papendract Netherlands Seabird Island School British Columbia and The Little Village Academy Chicago

***Creating Spaniards*** Sandie Eleanor Holguin, 2002 *Creating Spaniards* is a cultural and intellectual history that explains the intersection of politics and culture and the formation of a national identity during Spain's Second Republic and Civil War It counters recent scholarship claiming that leaders of the Second Republic had no programs for inventing traditions to encourage a Spanish national identity Focusing on the Second Republic 1931-1936 Sandie Holguin illustrates how various intellectuals and politicians of the Republican Socialist coalition used theater literature and film to aid the construction of a unified Spanish culture and history She uses memoirs journals newspapers parliamentary debates and archival sources in her examination of the impact that cultural reforms had on the transformation of one of Europe's oldest states

**Explorations in Classical Sociological Theory** Kenneth Allan, 2010 *Explorations in Classical Sociological Theory* Seeing the Social World Second Edition is an undergraduate sociological theory textbook that introduces the student to the major classical theorists including Marx Spencer Durkheim Weber Simmel Mead Schutz Gilman and Du Bois The theorists were chosen for the diversity of their perspectives as well as their ability to introduce the student to contemporary theory Kenneth Allan uses a lively informative writing style to engage the students in the eras of social change that spawned the major sociological theories and then applies them to the current era which also is experiencing major social change Features and benefits The book includes a glossary of terms Each of the theorist's important concepts are highlighted in the text and clear definitions provided in the glossary This feature is particularly important because theory is made up of terms and concepts and without the use of a glossary it is very easy for

the undergraduate theory student to lose track of the terms and meanings While the book is organized primarily around the individual theorist s perspective a categorical scheme is also provided so the student can roughly situate the theorists and decide for themselves some of sociology s big questions The scheme provided in the book is not the one usually used by textbooks The more commonly used scheme conflict functional interaction hides some really important questions that the student needs to consider for example is society an object or does it exist only through interpretations The book provides an appendix with complete definitions of most of sociology s major perspectives e g critical theory including feminism race and queer theory postmodernism and so on exchange theory rational choice theory dramaturgy ethnomethodology structuration network theory ecological theory social phenomenology and so on The book introduces the power and poetry of theory by extensive use of original source material from the theorists writings      **On the Battlefield of Merit** Daniel R.
