Radical Media Rebellious Communication And Social Movements:

Radical Media John D. H. Downing, 2000-08-18 This is an entirely new edition of the author's 1984 study originally published by South End Press of radical media and movements. The first and second sections are original to this new edition. The first section explores social and cultural theory in order to argue that radical media should be a central part of our understanding of media in history. The second section weaves an historical and international tapestry of radical media to illustrate their centrality and diversity from dance and graffiti to video and the internet and from satirical prints and street theatre to culture jamming, subversive song performance art and underground radio. The section also includes consideration of ultra rightist media as a key contrast case. The book's third section provides detailed case studies of the anti fascist media explosion of 1974-75 in Portugal, Italy's long running radical media radio and access video in the USA and illegal media in the dissolution of the former Soviet bloc dictatorships.

Radical Media: Rebellious Communication and Social Movements John Derek Hall Downing, 2001 Radical Media analyses radical media and movements worldwide from dance and graffiti to video and the Internet and from satirical prints and street theatre to culture jamming, subversive song performance art and underground radio.

Social Movements Savyasaachi, Ravi Kumar, 2017-09-19 This volume attempts to show the emerging contours of transformative action in social movements across South Asia. It argues that these contours have been shaped by contestations over questions of equity, justice and well being on the one hand and the nature and scope of new and classical social movements on the other. This is manifest in diverse modes through people's struggles, protest and dissent. The authors examine a variety of themes that have determined the course of the politics of transformative struggles. They critique neoliberalism, primitive accumulation, money class inequalities as well as aspects of capital labour conflict. They highlight the contributions of movements by women, dalit and marginalized communities, peace movements and environmental and agrarian struggles. The volume also appraises the role of internet in grassroots mobilizations and that of civil society networks in the making of participatory democracy. It further argues that the predicaments of cultural, ethnic, national, regional and linguistic identities are not divorced from capital labour conflicts. The book will serve as essential reading for students and scholars of sociology, social movements, politics, gender and feminist studies, labour studies and the informed general reader.

How digital technologies have been changing individual and collective actions Francesco Antonelli,2017-04-01 Recently the digital architectures of interaction have also become more than a new information architecture a new ecology of dialogue and participation In addition to the new forms of debate and interaction which are expressed far beyond the dynamics of modern public opinion the digital networks have opened spaces of experimentation for new decision making collaborative practices In several areas the creation of platforms and architectures of debate and deliberations is putting new questions about the

technological possibility of overcoming the representative democracy Finally this new digital ecology has been changing social actions in everyday life The book analyzes these phenomena both through a theoretical reflection first part and by some case studies second part as the result of the activities promoted by the Net Activism International Research Network based on Atopos Lab in Universidade de S o Paulo At the Network join Universit degli Studi Roma Tre Universidade Lus fona do Porto Universit de Lille 2 Fondation Maison des Sciences de l Homme Paris Francesco Antonelli is Research Fellow in Sociology at the Department of Political Sciences Universit degli Studi Roma Tre Recent publications European Politics of Numbers Sociological Perspectives on Official Statistics General Trends International Review of Sociology 26 3 2016 L Europa del dissenso Teorie e analisi sociopolitiche Milano Franco Angeli 2016

Digital Activism in Zimbabwe Tenford Chitanana,2024-10-21 This book investigates the role of the internet and social media in political processes in non western and non democratic contexts Using Zimbabwe as a case study the book demonstrates how activists and ordinary people deploy social media particularly Facebook to subvert an enduring hegemonic state However the book also highlights how authoritarian regimes are in turn learning and adapting to the information age challenging the impact of digital activism Studies of digital activism in the Global South are often centred around democracy but this book paints a more complex picture examining the role and effect of digital activism in challenging state hegemony in authoritarian contexts The book notes that while communication technologies help mediate activism they are also simultaneously constrained by pre existing and emergent challenges tied to the social and political context and the inherent limitations of those technologies The book investigates the tactics used by digital activists the contextual factors and restrictive political environment they operate in including the role of pro government activists and ultimately the impact of digital activism given these constraints From the case of Zimbabwe the book builds out a broader theoretical analysis of the evolution of third world protest in the digital age examining the limitations of activists actions and the ideological deficit in

The Empire of Mind Michael Strangelove, 2005-12-15 Where many critics see the Internet as an instrument of corporate hegemony Michael Strangelove sees something else an alternative space inhabited by communities dedicated to anarchic freedom culture jamming alternative journalism and resistance to authoritarian forms of

consumer capitalism and globalization In *The Empire of Mind* Dr Strangelove the scholar Canadian Business referred to as the acknowledged dean of Internet entrepreneurs and *Wired* called the Canadian guru of Internet advertising presents the compelling argument that the Internet and new digital communication technology actually undermine the power of capital producing an alternative symbolic economy Strangelove contends that the Internet breaks with the capitalist logic of commodification and that while television produces a passive consumer audience Internet audiences are more active creative and subversive Writers activists and artists on the Internet undermine commercial media and its management of consumer behaviour a behaviour that is challenged by the Web's tendency toward the disintegration of intellectual property rights Case studies describe the invention of new meaning given to cultural and consumer icons like Barbie and McDonald's and explore how novel modes of online news production alter the representation of the world as it is produced by the mainstream corporate press In the course of exploring new media *The Empire of Mind* also makes apparent that digital piracy will not be eliminated The Internet community effectively converts private property into public thereby presenting serious obstacles for the management of consumer behaviour and significantly eroding brand value Much to the dismay of the corporate sector online communities are disinterested in the ethics of private property In fact the entire philosophical framework on which capitalism is based is threatened by these alternative means of cultural production
