Hearings United States. Congress Senate,1965 **Taking Responsibility for Children** Samantha Brennan,Robert Noggle,2007-12-04 What do we as a society and as parents in particular owe to our children Each chapter in Taking Responsibility for Children offers part of an answer to that question Although the contributors vary in the approaches they take and the conclusions they draw each one explores some aspect of the moral obligations owed to children by their caregivers Some focus primarily on the responsibilities of parents while others focus on the role of society and government Taking Responsibility for Children will be of interest to philosophers advocates for children s interests and those interested in public policy especially as it relates to children and families Jacket **The Language and Reality of Time** Thomas Sattig,2006-05-11 Thomas Sattig s book develops a comprehensive framework for doing philosophy of time He brings together a variety of different perspectives linking our ordinary conception of time with the physicist s conception and linking questions about time addressed in metaphysics with questions addressed in the philosophy of language Within this framework Sattig explores the temporal dimension of the material world in relation to the temporal dimension of our ordinary discourse about the world The discussion is centred around the dispute between three dimensionalists and four dimensionalists about whether the temporal profile of ordinary objects mirrors their spatial profile Are ordinary objects extended in time in the same way in which they are extended in space Do they have temporal as well as spatial parts Four dimensionalists say yes three dimensionalists say no Sattig develops an original three dimensionalist picture of the material world and argues that this picture is preferable to its four dimensionalists rivals if ordinary thought and talk are taken seriously Among the issues that Sattig discusses are the metaphysics of persistence change composition location coincidence and relativity the ontology of past present and future and the semantics of predication tense temporal modifiers and sortal terms **The Natural and the Artefactual** Keekok Lee,1999-01-01 In this book philosopher Keekok Lee challenges one of the central assumptions of contemporary environmentalism that if we could reduce or eliminate pollution we could save the planet without unduly disrupting our modern industrialized societies Lee argues instead that the process of modernization with its attendant emphasis on technological innovation has fundamentally transformed nature into just another manmade artefact Ultimately what needs to be determined is if nature has value above and beyond human considerations whether aesthetic spiritual or biological This provocative book attempts to reconfigure environmental ethics positing the existence of

two separate ontological categories the natural and the artefactual Natural entities be they organisms or inert matter are morally considerable because they possess the ontological value of independence whereas artefacts are created by humans expressly to serve their own interests and ends *Study of Reconstruction Finance Corporation* United States.
