Four types of HB and SE course outlines are presented and discussed with an eye toward strengthening foundation courses along with an analysis of fourteen frequently used Human Behavior and Social Environment textbooks based on the Council on Social Work Education's 2001 guidelines that also offers a framework for integrating content. The application of the transtheoretical model of behavioral change to the welfare to work transition with public housing residents is presented using both quantitative and qualitative data that has been closely analyzed. The Conundrum of Human Behavior in the Social Environment provides extensive references, clear and helpful figures and tables of data, numerous appendices of useful detailed outlines and descriptions of textbooks, lists of Web sites, a syllabi and course sequence description for micro, macro, mezzo issues.
