This translation of *A Brief History of Radio Astronomy in the USSR* makes descriptions of the antennas and instrumentation used in the USSR, the astronomical discoveries as well as interesting personal backgrounds of many of the early key players in Soviet radio astronomy available in the English language for the first time. This book is a collection of memoirs recounting an interesting but largely still dark era of Soviet astronomy. The arrangement of the essays is determined primarily by the time when radio astronomy studies began at the institutions involved. These include the Lebedev Physical Institute, FIAN, Gorkii State University and the affiliated Physical Technical Institute, GIFTI, Moscow State University, Sternberg Astronomical Institute, GAISH and Space Research Institute, IKI, the Department of Radio Astronomy of the Main Astronomical Observatory in Pulkovo, GAO, Special Astrophysical Observatory, SAO Byurakan, Astrophysical Observatory, BAO, Crimean Astrophysical Observatory, Academy of Sciences of the Ukraine, SSR Institute of Radio Physics and Electronics of the USSR, Academy of Sciences, IRE, Institute of Terrestrial Magnetism, the Ionosphere and Radio Wave Propagation, Institute, IZMIRAN, Siberian Institute of Terrestrial Magnetism, the Ionosphere and Radio Wave Propagation, SibIZMIRAN, the Radio Astrophysical Observatory of the Latvian Academy of Sciences and Leningrad State University. *A Brief History of Radio Astronomy in the USSR* is a fascinating source of information on a past era of scientific culture and fields of research including the Soviet SETI activities. Anyone interested in the recent history of science will enjoy reading this volume.

It is an extremely well-written but unusual book that I highly recommend for all physicists. The Physics Teacher.
