Modern first editions, Clique Limited, The, 1996-12 American Nature Writers John Elder, 1996 The Scribner Writers Series has set the standard for literary reference for more than 25 years In addition to addressing the lives and careers of important writers the articles discuss the themes and styles of major works and place them in pertinent historical social and political contexts for today's readers Novelists playwrights essayists poets short story writers and more recently genre writers in science fiction and mystery are all expertly discussed in the more than 16 sets comprising this series The essays in the set combine biography criticism and in some cases original interviews to tell the story of each author This set includes 70 biographical critical essays on such writers as Rachel Carson Ralph Waldo Emerson Henry David Thoreau and Gary Snyder and 12 general subject essays **English Literature** Harvard University. Copyright Office, 1962 Includes Part 1 Number 1 Books and Pamphlets Including Serials and Contributions to Periodicals January June **American Book Prices Current**, 1999 **Sea-Brothers** Bert Bender, 2015-11-16 Sea Brothers offers the most extensive analysis to date of the sea and its meaning in American literature On the basis of his study of Melville Crane London Hemingway Matthiessen and ten lesser known sea writers Bert Bender argues that the tradition of American sea fiction did not end with the opening of the western frontier and the replacement of sailing ships by steamers Rather he demonstrates its continuity and vitality identifying a central vision within the tradition and showing how particular authors draw from transform and contribute to it What is most distinctive about American sea fiction Bender contends is its visionary often mystical response to the biological world and to man's perceived place in the larger universe When Melville envisioned the sea as the essential element of life indeed as life itself he changed the course of American sea fiction by introducing the relevance of biological thought But his meditations on the whale and the ungraspable phantom of life project a different reality from that envisioned by his successors In American sea fiction after Melville the influence of *Origin of Species* is as

powerful as that of Moby Dick or the theme of sailing ships being displaced by steam The ideal of brotherhood so central to American sea fiction was severely compromised by the biological reality of a competitive warring nature Twentieth century sea fiction has continued to center on the biological world and address the possibility of democratic brotherhood but the issues were fundamentally changed by Darwin's theories This book will be a valuable source for students and scholars of American literature and will interest readers of sea fiction *American Book Publishing Record Cumulative, 1950-1977: Fiction. Juvenile fiction* R.R. Bowker Company. Department of Bibliography, 1978
