Railroad Vision Photography Travel And Perception:

Railroad Vision Anne M. Lyden, 2003 The invention of railway transportation coincided with the invention of photography together these innovations changed our preception of time space of our place in the world Anne Lyden presents over 100 photographs with railway themes showing how these technologies complimented each other over time *A Royal Passion* Anne M. Lyden, 2014-02-04 In January 1839 photography was announced to the world Two years prior a young Queen Victoria ascended to the throne of Great Britain and Ireland These two events while seemingly unrelated marked the beginnings of a relationship that continued throughout the nineteenth century and helped construct the image of an entire age *A Royal Passion* explores the connections between photography and the monarchy through Victoria s embrace of the new medium and her portrayal through the lens Together with Prince Albert her beloved husband the Queen amassed one of the earliest collections of photographs including works by renowned photographers such as Roger Fenton Gustave Le Gray and Julia Margaret Cameron Victoria was also the first British monarch to have her life recorded by the camera images of her as wife mother widow and empress proliferated around the world at a time when the British Empire spanned the globe The featured essays consider Victoria s role in shaping the history of photography as well as photography s role in shaping the image of the Queen Including more than 150 color images several rarely seen before drawn from the Royal Collection and the J Paul Getty Museum this volume accompanies an exhibition of the same name on view at the J Paul Getty Museum from February 4 to June 20 2014 *Photography, Vision, and the Production of Modern Bodies* Suren Lalvani, 1996-01-01 Lalvani argues that modernity represents the powerful privileging of vision and the introduction of a paradigm of seeing that is historically distinctive Taking the introduction of photography in the nineteenth century as a crucial development in the expansion of modern vision he draws on the writings of Alan Sekula John Tagg Jonathan Crary Norman Bryson and Martin Jay to examine in a comprehensive manner how photography functioned to organize a set of relations between knowledge power and the body However in taking a broad cultural studies approach Lalvani situates the practices of photography within the larger visual order of the nineteenth century He demonstrates how the new lines of visibility formed not only by photography but by new urban spaces and new modes of transportation resulted in a particular organizing of the social order of subjectivity and social relations **Photography and Other Media in the Nineteenth Century** Nicoletta Leonardi, Simone Natale, 2018-11-08 In this volume leading scholars of photography and media examine photography s vital role in the evolution of media and communication in the nineteenth century In the first half of the nineteenth century the introduction of telegraphy the development of a cheaper and more reliable postal service the rise of the mass circulation press and the emergence of the railway dramatically changed the way people communicated and experienced time and space Concurrently photography developed as a medium that changed how images were produced and circulated Yet for the most part photography of the era is studied outside the field of media history The contributors to this volume challenge those

established disciplinary boundaries as they programmatically explore the intersections of photography and new media during a period of fast paced change Their essays look at the emergence and early history of photography in the context of broader changes in the history of communications the role of the nascent photographic press in photography s infancy and the development of photographic techniques as part of a broader media culture that included the mass consumed novel sound recording and cinema Featuring essays by noteworthy historians in photography and media history this discipline shifting examination of the communication revolution of the nineteenth century is an essential addition to the field of media studies In addition to the editors contributors to this volume are Geoffrey Batchen Geoffrey Belknap Lynn Berger Jan von Brevern Anthony Enns Andr Gaudreault Lisa Gitelman David Henkin Erkki Huhtamo Philippe Marion Peppino Ortoleva Steffen Siegel Richard Taws and Kim Timby

Trains, Literature, and Culture Steven D. Spalding, Benjamin Fraser, 2012-01-01 Trains Literature and Culture Reading and Writing the Rails delves into the rich connections between rail travel and the creation of cultural products from short stories to novels from photographs to travel guides and from artistic manifestos of the avant garde to Freud s psychology Each of the contributions engages in critical readings of textual or visual representations of trains across a wide spectrum of time periods and traditions from English and American to Mexican West African and European literary cultures By turns trope metaphor and emblem of technological progress these textual and visual representations of the train serve at times to index racial and gender inequalities to herald the arrival of a nation s independence and at still others to evince the trauma of industrialization In each instance the figure of the train emerges as a complex narrative form engaged by artists who were Reading Writing the Rails as a way of assessing the competing discursive investments of cultural modernity

"Visions of the Industrial Age, 1830-1914" Amy Woodson-Boulton, 2017-07-05 Providing a comprehensive interdisciplinary assessment and with a particular focus on expressions of tension and anxiety about modernity this collection examines visual culture in nineteenth century Europe as it attempted to redefine itself in the face of social change and new technologies Contributing scholars from the fields of history art literature and the history of science investigate the role of visual

representation and the dominance of the image by looking at changing ideas expressed in representations of science technology politics and culture in advertising art periodicals and novels They investigate how during the period new emphasis was placed on the visual with emerging forms of mass communication photography lithography newspapers advertising and cinema while older forms as varied as poetry the novel painting interior decoration and architecture became transformed The volume includes investigations into new innovations and scientific development such as the steam engine transportation and engineering the microscope spirit photography and the orrery as well as how this new technology is reproduced in illustrated periodicals The essays also look at more traditional forms of creative expression to show that the same concerns and anxieties about science technology and the changing perceptions of the natural world can be seen in the art of Armand Guillaumin Auguste Rodin Gustave Caillebotte and Camille Pissarro in colonial nineteenth century novels in design manuals in museums and in the decorations of domestic interior spaces Visions of the Industrial Age 1830 1914 offers a thorough exploration of both the nature of modernity and the nature of the visual

The Rural Cemetery Movement
Jeffrey Smith, 2017-10-23 When Mount Auburn opened as the first rural cemetery in the United States in 1831 it represented a new way for Americans to think about burial sites It broke with conventional notions about graveyards as places to bury and commemorate the dead Rather the founders of Mount Auburn and the spate of similar cemeteries that followed over the next three decades before the Civil War created institutions that they envisioned being used by the living in new ways Cemeteries became places for leisure communing with nature and creating a version of collective memory In fact these cemeteries reflected changing values and attitudes of Americans spanning much of the nineteenth century In the process they became paradoxical they were rural yet urban natural yet designed artistic yet industrial commemorating the dead yet used by the living The Rural Cemetery Movement Places of Paradox in Nineteenth Century America breaks new ground in the history of cemeteries in the nineteenth century This book examines these rural cemeteries modeled after Mount Auburn that were founded between the 1830s and 1850s As such it provides a new way of thinking about these spaces and new paradigm for seeing and visiting them While they fulfilled the sacred function of burial they were first and foremost businesses The landscape and design regulation of gravestones appearance and rhetoric furthered their role as a business that provided necessary services in cities that went well beyond merely burying bodies They provided urban green spaces and respites from urban life established institutions where people could craft their roles in collective memory and served as prototypes for both urban planning and city parks These cemeteries grew and thrived in the second half of the nineteenth century for most the majority of their burials came before 1910 This expansion of cemeteries coincided with profound urban growth in the United States Unlike their predecessors founders of these burial grounds intended them to be used in many ways that reflected their views and values about nature life and death and relationships Emphasis on worldly accomplishments increased with industrialization and growth in the United States which was reflected in changing ways

people commemorated their dead during the period under this study Thus these cemeteries are a prism through which to understand the values attitudes and culture of urban America from mid century through the Progressive Era **Visions of**
