Retreat From Marriage Causes And Consequences:

The Retreat from Marriage Bryce J. Christensen, 1990 This study examines the social and cultural forces making marriage increasingly rare and fragile in the contemporary world Four essays together with an edited summary of debate among leading researchers help define the historical significance of current trends in family life in America Drawing from sociological statistics historical research literary criticism and philosophic reflection this book offers a wide ranging exploration of marital trends Co published with the Rockford Institute's Center on the Family in America *The Retreat from Marriage: Causes and Consequences* Bryce J. Christensen, 1990 Index included Papers from a conference convened by the Rockford Institute Center on the Family in America together with summaries of the discussions

A General Theory of Emotions and Social Life Warren D. TenHouten, 2006-11-22 Founded upon the psychoevolutionary theories of Darwin Plutchik and Izard a general socioevolutionary theory of the emotions affect spectrum theory classifies a wide spectrum of the emotions and analyzes them on the sociological psychological and neurobiological levels This neurocognitive sociology of the emotions supersedes the major theoretical perspectives developed in the sociology of emotions by showing primary emotions to be adaptive reactions to fundamental problems of life which have evolved into elementary social relationships and which can predict occurrences of the entire spectrum of primary complex secondary and tertiary emotions Written by leading social theorist Warren D TenHouten this book presents an encyclopaedic classification of the emotions describing forty six emotions in detail and presenting a general multilevel theory of emotions and social life The scope of coverage of this key work is highly topical and comprehensive and includes the development of emotions in childhood symbolic elaboration of complex emotions emotions management violence and cultural and gender differences While primary emotions have clearly defined valences this theory shows that complex emotions obey no algebraic law and that all emotions have both creative and destructive potentialities *The Retreat from Marriage and Parenthood* Sampson Lee Blair, Zheng Mu, 2025-05-28 The Retreat from Marriage and Parenthood seeks a broad examination of the retreat from marriage and parenthood Featuring diverse theoretical and methodological chapters exploring the many issues pertaining to these seismic changes the authors chronicle the many dramatic impacts from shifts in attitudes to marriage and family

Report to Congress on Out-of-Wedlock Childbearing, 1997-08 Nearly a third of all births occur outside of marriage This report summarizes scientific information on non marital fertility addresses these questions 1 what are the trends in non marital childbearing 2 what are the consequences of non marital childbearing for children adults for the public 3 what are the causes of the dramatic increase in non marital fertility what factors have contributed to the upsurge in non marital childbearing how can we prevent pregnancy or childbearing among unmarried persons what policies actions should we take to ameliorate the negative consequences associated with non marital childbearing parenthood *Convergence or Divergence?* Simon Langlois, Theodore Caplow, 1994-11-16 Trends in fertility decline intergenerational relations religion and

secularization ecological movements employment and labour market changes personal authority and social conflict are examined This analysis shows an unmistakable convergence of social trends except in the domain of religion But when the interconnection of these trends within each national society is examined unexpected divergences are revealed There are parallel trends in demography organization of production national institutions social practices and life style and divergent trends in social inequality social movements and local institutions Barriers between social classes have eroded and something that might be called multidimensional stratification has emerged the diminution of violence in social conflicts implies an increasing volume of negotiation and all forms of personal authority have been weakened The transformation of the family structure is no doubt one of the most important changes in western civilization The cross national analyses of recent social trends help us to assess both convergence and divergence and to identify emergent singularities Does convergence of trends mean these societies face a common destiny With respect to trends so strong that they act as exogenous variables the answer is yes However with respect to the responses those trends elicit in the context of a particular society the answer is no

Massive convergence of trends does not mean that societies face a uniform future Beyond Rhetoric DIANE Publishing Company,1995-10 Presents the Commission's findings conclusions and recommendations Part 1 focuses on the crisis facing the nation's children and families Part 2 presents the Commission's agenda for the 1990's organized into chapters focused on the broad policy areas that are most vital to children and families Part 3 summarizes the Commission's vision for a better society and their recommendations for building the necessary commitment to achieve it Photos and graphs

Abstinence Education United States. Congress. Senate. Committee on Appropriations. Subcommittee on Departments of Labor, Health and Human Services, Education, and Related Agencies,1997

Why America Needs Religion Guenter Lewy,1996 In this trenchant analysis of the moral decline of modern America Lewy describes the moral crisis caused by secular modernity and points to the role of religiousness as a necessary bulwark against today's social ills

Social Inequality Kathryn Neckerman,2004-06-18 Inequality in income earnings and wealth has risen dramatically in the United States over the past three decades Most research into this issue has focused on the causes global trade new technology and economic policy rather than the consequences of inequality In *Social Inequality* a group of the nation's leading social scientists opens a wide ranging inquiry into the social implications of rising economic inequality Beginning with a critical evaluation of the existing research they assess whether the recent run up in economic inequality has been accompanied by rising inequality in social domains such as the quality of family and neighborhood life equal access to education and health care job satisfaction and political participation Marcia Meyers and colleagues find that many low income mothers cannot afford market based child care which contributes to inequality both at the present time by reducing maternal employment and family income and through the long term consequences of informal or low quality care on children's educational achievement At the other end of the educational spectrum Thomas Kane links the growing inequality in college attendance to rising tuition and cuts in

financial aid Neil Fligstein and Taek Jin Shin show how both job security and job satisfaction have decreased for low wage workers compared with their higher paid counterparts Those who fall behind economically may also suffer diminished access to essential social resources like health care John Mullahy Stephanie Robert and Barbara Wolfe discuss why higher inequality may lead to poorer health wider inequality might mean increased stress related ailments for the poor and it might also be associated with public health care policies that favor the privileged On the political front Richard Freeman concludes that political participation has become more stratified as incomes have become more unequal Workers at the bottom of the income scale may simply be too hard pressed or too demoralized to care about political participation Social Inequality concludes with a comprehensive section on the methodological problems involved in disentangling the effects of inequality from other economic factors which will be of great benefit to future investigators While today s widening inequality may be a temporary episode the danger is that the current economic divisions may set in motion a self perpetuating cycle of social disadvantage The most comprehensive review of this quandary to date Social Inequality maps out a new agenda for research on inequality in America with important implications for public policy
