Wildlife Production Systems Robert J. Hudson, K. R. Drew, L. M. Baskin, 1989-06 This book first published in 1989 examines the controversial position of commercial utilisation in relation to wildlife conservation Production of large mammals has earned respectability as an agricultural strategy and its evaluation has been listed as a priority requirement in the World Conservation Strategy However many authorities question whether wildlife production is a viable economic and environmental strategy and suggest that it runs counter to its claimed purpose This book evaluates this controversy by chronicling the changing role of wildlife and by reflecting on the implications of these trends The book should be of interest to people both applauding and deploring the use of wildlife in this economic role

Wood Joachim Radkau, 2013-12-23 tzi the iceman could not do without wood when he was climbing his Alpine glacier nor could medieval cathedral builders or today's construction companies From time immemorial the skill of the human hand has developed by working wood so much so that we might say that the handling of wood is a basic element in the history of the human body The fear of a future wood famine became a panic in the 18th century and sparked the beginnings of modern

environmentalism This book traces the cultural history of wood and offers a highly original account of the connection between the raw material and the human beings who benefit from it Even more it shows that wood can provide a key for a better understanding of history of the peculiarities as well as the varieties of cultures of a co evolution of nature and culture and even of the rise and fall of great powers Beginning with Stone Age hunters it follows the twists and turns of the story through the Middle Ages and the Industrial Revolution to the global society of the twenty first century in which wood is undergoing a varied and unexpected renaissance Radkau is sceptical of claims that wood is about to disappear arguing that such claims are self serving arguments promoted by interest groups to secure cheaper access to and control over wood resources The whole forest and timber industry often strikes the outsider as a world unto itself a hermetically sealed black box but when we lift the lid on this box as Radkau does here we will be surprised by what we find within Wide ranging and accessible this rich historical analysis of one of our most cherished natural resources will find a wide readership

The Age of Ecology Joachim Radkau, 2014-04-03 This book is the first major study of the history of environmentalism from its origins in romanticism and the nature cults of the late 18th century to the global environmental movements of today Radkau shows that this is not a single story of the steady ascent of environmentalism but rather a multiplicity of stories each with its own dramatic tension between single issue movements and the challenges posed by the interconnection of environmental issues between charismatic leaders and bureaucratic organizations and between grassroot movements and global players While the history can be traced back several centuries environmentalism has flourished since the environmental revolution of 1970 spurred on by the Chernobyl nuclear disaster in 1986 and the growing concern about global warming While environmentalists often opposed the scientific mainstream they were also often led by scientific knowledge Environmentalism is the true Enlightenment of our time so much so that we can call our era the age of ecology This timely and comprehensive global history of environmentalism will be essential reading for anyone concerned with the most pressing global issues of our time

Imagining Extinction Ursula K. Heise, 2016-08-10 We are currently facing the sixth mass extinction of species in the history of life on Earth biologists claim the first one caused by humans Activists filmmakers writers and artists are seeking to bring the crisis to the public's attention through stories and images that use the strategies of elegy tragedy epic and even comedy *Imagining Extinction* is the first book to examine the cultural frameworks shaping these narratives and images Ursula K Heise argues that understanding these stories and symbols is indispensable for any effective advocacy on behalf of endangered species More than that she shows how biodiversity conservation even and especially in its scientific and legal dimensions is shaped by cultural assumptions about what is valuable in nature and what is not These assumptions are hardwired into even seemingly neutral tools such as biodiversity databases and laws for the protection of endangered species Heise shows that the conflicts and convergences of biodiversity conservation with animal welfare advocacy environmental justice and discussions about the Anthropocene open up a new vision of multispecies justice Ultimately *Imagining Extinction*

demonstrates that biodiversity endangered species and extinction are not only scientific questions but issues of histories cultures and values , **Filme** ,1989 **International Environmental Agreements and Domestic Politics** Arild Underdal,Kenneth Hanf,2019-06-04 This title was first published in 2000 In examining the domestic politics of international co operation this book addresses two important questions 1 Why do governments often take different positions in negotiations about common problems why do some states push for international regulation while others hold back 2 How can variance in the domestic implementation of and compliance with international agreements be explained why do some states deliver more than they have promised others less The authors report findings and observations from a major study which focused on efforts to establish international regulations to cope with the problem known as acid rain They provide in depth case studies of nine European countries as well as a comparative analysis searching for patterns and general conclusions

The Re-introduction of the Lynx Into the Alps Christine Breitenmoser-Würsten,Christoph Rohner,Urs Breitenmoser,1998-01-01 *Agroforestry in Europe* Antonio Rigueiro-Rodríguez,Jim McAdam,María Rosa Mosquera-Losada,2008-11-09 Agroforestry has come of age during the past three decades The age old practice of growing trees and crops and sometimes animals in interacting combinations that has been ignored in the single commodity oriented agricultural and forestry development paradigms has been brought into the realm of modern land use Today agroforestry is well on its way to becoming a specialized science at a level similar to those of crop science and forestry science To most land use experts however agroforestry has a tropical connotation They consider agroforestry as something that can and can only be identified with the tropics That is a wrong perception While it is true that the tropics compared to the temperate regions have a wider array of agroforestry systems and hold greater promise for potential agroforestry interventions it is also true that agroforestry has several opportunities in the temperate regions too Indeed the role of agroforestry is now recognized in Europe as exemplified by this book North America and elsewhere in the temperate zone Current interest in ecosystem management in industrialized countries strongly suggests that there is a need to embrace and apply agroforestry principles to help mitigate the environmental problems caused or exacerbated by commercial agricultural and forestry production enterprises **Exploring Apocalyptica** Frank Uekötter,2018-08-11 Environmental alarmism has long been a political bellwether Tell me what you think about the green apocalypse and I ll tell you where you stand on the issues But as the environmental heydays of the 1970s move into perspective the time has come for a reassessment Horror scenarios create a legacy whose effects have largely escaped attention Based on case studies from four continents and the North Atlantic Exploring Apocalyptica argues for a reevaluation of familiar clichés It shows that environmentalists were less apocalyptic than commonly thought and other groups were far more enthusiastic It traces an interconnection with Cold War fears and economic depressions and demonstrates how alarmism faced limits in the Global South It also suggests that past horror scenarios impose constraints on ongoing debates At a time when climate change turns from a scenario into an experienced

reality this book charts paths for an age that may have already moved beyond the peak apocalypse *Cultural Landscapes and Land Use* Martin Dieterich, Jan van der Straaten, 2006-07-06 Cultural landscapes are created by people and used by people but still decidedly rich in biodiversity and in harmony with nature The landscapes of fairy tales without dragons Socio economic complexity on top of biological diversity is the challenge nature conservation faces in the context of cultural landscape This book is an attempt to approach this complexity and provide a theoretical background as well as guidelines and examples for hands on solutions It draws on inputs from scientists administrators independent consultants and politicians from Europe and the United States With a particular emphasis on agriculture it attempts to merge disciplines such as philosophy law planning economics and conservation biology toward a common goal nature conservation and the preservation of biological diversity in landscapes under the pressure of human usage *Acidic Precipitation* A.H.M. Bresser, W. Salomons, 2012-12-06 awareness of the world's citizens and encourage governments to devote more attention and resources to address this issue The series editors thank the international panel of contributors for bringing this timely series into completion We also wish to acknowledge the very insightful input of the following colleagues Prof A L Page of the University of California Prof T C Hutchinson of the University of Toronto and Dr Steve Lindberg of the Oak Ridge National Laboratory We also wish to thank the superb effort and cooperation of the volume editors in handling their respective volumes The constructive criticisms of chapter reviewers also deserve much appreciation Finally we wish to convey our appreciation to my secretary Ms Brenda Rosier and my technician Ms Claire Carlson for their very able assistance in various aspects of this series Aiken South Carolina Domy C Adriano Coordinating Editor Preface to Acidic Precipitation Volume 5 Advances in Environmental Science Acidification research has been ongoing for several decades It was not until the 1980s however that scientists began to recognize the complexity of the factors causing the decline in forest growth and deterioration of fish populations in acidified lakes The general feeling based on correlative research was that long range transported air pollution was the main cause Proof however was difficult to obtain because of complex interactions of various stress factors including natural ones **Pasture Landscapes and Nature Conservation** Bernd Redecker, Werner Härdtle, Peter Finck, Uwe Riecken, Eckhard Schröder, 2012-12-06 One of the main problems and aims of nature conservation in Europe is to protect semi open landscapes The development during the past decades is characterized by an ongoing intensification of land use on the one hand and an increasing number of former meadows and pastures lying fallow caused by changing economic conditions on the other hand In several countries the establishment of larger pasture landscapes with a mixed character of open grassland combined with shrubs and forests has been recognized as one solution to this problem The book gives an overview of the European projects concerning to this topic nature conservation policy and strategies scientific results and practical experiences creating large scale grazing systems **Conflicted Identities** Alexandra Staub, 2015-10-23 Nation states have long used representational architecture to create symbolic identities for public

consumption both at home and abroad Government buildings major ensembles and urban plans have a visibility that lends them authority while their repeated portrayals in the media cement their image as icons of a shared national character Existing in tandem with this official self however is a second often divergent identity represented by the vast realm of domestic space defined largely by those who occupy it as well as those with a vested interest in its cultural meaning Using both historical inquiry and visual spatial and film analysis this book explores the interaction of these two identities and its effect on political control class status and gender roles *Conflicted Identities* examines the politicization of both public and domestic space especially in societies undergoing rapid cultural transformation through political social or economic expansion or restructuring when cultural identity is being rapidly modernized shifted or realigned to conform to new demands Using specific examples from a variety of national contexts the book examines how vernacular housing legislation marketing and media influence a large but often underexposed domestic culture that runs parallel to a more publicly represented one As a case in point the book examines West Germany from the end of World War II to the early 1970s to probe more deeply into the mechanisms of such cultural dichotomy On a national level post war West Germany demonstratively rejected Nazi era values by rebuilding cities based on interwar modernist tenets while choosing a decidedly modern and transparent architecture for high visibility national projects In the domestic realm government media and everyday citizens countered this turn to state sponsored modernism by embracing traditional architectural aesthetics and housing that encouraged patriarchal family structures Written for readers interested in cultural theory history and the politics of space as well as those engaged with architecture and the built environment *Conflicted Identities* provides an engaging new perspective on power and identity as they relate to architectural settings

Values Cockpits Friedrich Glauner, 2017-07-25 This book answers the question of how soft factors such as corporate cultures and individual and corporate values can be transparently steered With its C4 management tool and reflecting the seven driving forces of corporate culture the *Values Cockpit* is a powerful solution designed to steer all dimensions and processes of a company pursuing a lean approach The book links strategic approaches on how to steer a company towards excellence with insights into the driving forces of human thoughts and actions It subsequently introduces the *Values Cockpit* which allows individual corporate cultures to be developed and controlled on the basis of a rational approach It has since become commonplace that for the best companies in the world it is their great corporate culture that sustains their excellence and economic success In order to establish such a corporate culture all corporate values must be thoroughly controlled steered and measured This book serves as an essential guide helping companies to reach these goals and ensure their sustainable economic success

Animals in the Third Reich Boria Sax, 2000-01-01 This is the first book to explore the paradox of the Nazi cult of animals and the obsession with the annihilation of biologically inferior people *Animals in the Third Reich* begins by contrasting Jewish Christian and polytheistic traditions relating to animals in Germany and examines the ways that the Nazi

movement adopted altered challenged or exploited these traditions This discussion covers several perspectives on the treatment of animals including those of zoologists veterinarians novelists painters sculptors and the general public Adopting and exploiting such traditions the Nazis elaborated their own symbolic system of relating certain animals to supporters and antagonists of the movement Aryan wolves and horses Jewish pigs and apes BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved *Exposés* ,1986 **The Aesthetics of Mythmaking in German Postwar Culture** André Fischer,2024-03-15 Myths are a central part of our reality But merely debunking them lets us forget why they are created in the first place and why we need them Andr Fischer draws on key examples from German postwar culture from novelists Hans Henny Jahnn and Hubert Fichte to sculptor and performance artist Joseph Beuys and filmmaker Werner Herzog to show that mythmaking is an indispensable human practice in times of crisis Against the background of mythologies based in nineteenth century romanticism and their ideological continuation in Nazism fresh forms of mythmaking in the narrative visual and performative arts emerged as an aesthetic paradigm in postwar modernism Boldly rewriting the cultural history of an era and setting in transition The Aesthetics of Mythmaking in German Postwar Culture counters the predominant narrative of an exclusively rational Vergangenheitsbewältigung coming to terms with the past Far from being merely reactionary the turn toward myth offered a dimension of existential orientation that had been neglected by other influential aesthetic paradigms of the postwar period Fischer s wide ranging transmedia account offers an inclusive perspective on myth beyond storytelling and instead develops mythopoesis as a formal strategy of modernism at large
