Abstract

In recent decades, there has been a resurgence of interest in natural theology, not merely among Catholics, but also among Protestants. This would not come as a surprise to Karl Barth, who believed it to be a perennial temptation for believers, a “Hydra” that always grows a new head when an old one is struck down. However, there is a need to assess how new defenders of natural theology have responded to Barth’s critique, and whether natural theology is now viable also within Protestant thought. In this article, I assess the effectiveness of Barth’s critique of natural theology in light of the responses by two of natural theology’s most prominent contemporary defenders: Richard Swinburne and Alister McGrath.

Keywords: natural theology, analogy of being, Karl Barth, Richard Swinburne, Alister McGrath

Introduction

Karl Barth (1886–1968), possibly the most influential theologian of the 20th century, believed that natural theology is the antithesis of true Christian theology, a temptation occurring time and again in Church history. According to Barth, “so far there has not been a single attempt at renewal in Evangelical theology to which openly or secretly, from near or from far, it has not

Return To Natural Theology:

A Return to Natural Theology F. H. Cleobury, 1967 *A Return to Natural Theology*, by F.H. Cleobury F. H. Cleobury, 1967 Theism as a Science of Natural Theology and Natural Religion Charles Voysey, 1895 **The Bible, Natural Theology and Natural Law: Conflict Or Compromise?** Robert A. Morey, 2010-05 Dr Robert Morey's study of natural law and natural theology raises important questions that every Bible believer will want answered His careful study and explanation of various Bible passages will yield a useful orientation to the classic arguments furnished us by the Reformers and their faithful heirs Dr Nelson Kloosterman The present volume presents a devastating critique of natural theology and natural law Its argument is solidly biblical and its accumulation of biblical data is overwhelming I hope that God prospers it so that many will read it and take heed Dr John Frame A W Tozer said the most important thing about any person is what comes into their mind when they think of the word God If you digest Dr Morey's book you will think of God as the glorious One depicted in Holy Scripture John G Reisinger I appreciate Dr Morey's emphasis on making the Bible alone the theoretical basis for science and the arts All throughout the book he consistently points to the Scriptures as the basis for sustaining everything else Dr Simon Kistemaker Dysteleology Michael Berhow, 2019-06-25 A common theological critique of intelligent design ID centers on the problem of dysteleology This problem states that because there are clear examples of suboptimal design in biology life is probably not the product of an engineer like designer If it were then one could argue that the designer is less than fully competent ID critic Francisco Ayala expresses this critique in the following question If functional design manifests an Intelligent Designer why should not deficiencies indicate that the Designer is less than omniscient or less than omnipotent This book provides a philosophical analysis of two approaches to answering this question one offered by Ayala and the other offered by William Dembski a leading ID theorist *Natural Theology* Maurice Muhatia Makumba, 2006 **The Natural History of Creation** Michael Anthony Corey, 1995 The Natural History of Creation is the third and final installment in M A Corey's natural theology series This remarkable trilogy has worked in tandem with the findings of modern science to help spearhead the rebirth of the once dead natural theology movement In this detailed yet easy to read work the author focuses on the religious account of creation found in Genesis One and comes to the astonishing conclusion that there is indeed much scientific truth to be found in this ancient work Many other writers have also noticed the breathtaking parallels that exist between modern evolutionism and the creation account given in the Bible but nowhere will the reader find a more thorough description of them than in The Natural History of Creation Back cover **Covering Up Luther** Rustin E. Brian, 2013-03-13 Karl Barth's Christology provides a key to out narrating the Deus absconditus which as Rustin Brian contends is in fact the god of modernity Included in this is the rejection of the logical and philosophical systems that allow for the modern understanding of God as the Deus absconditus namely dialectics and nominalism This rejection is illustrated interestingly enough in Barth's decision to literally cover up with a rug Martin Luther's works in his

personal library Surely this was more than a decorative touch The reading of Barth s works that results from this starting point challenges much of contemporary Barth scholarship and urges readers to reconsider Barth Through careful examination of a large body of Barth s writings particularly in regard to the issues of the knowledge or knowability of God as well as Christology Brian argues that contemporary Barth scholarship should be done in careful conversation with the finest examples of both Protestant and especially Roman Catholic theology Barth s paradoxical Christology thus becomes the foundation for a dogmatic ecumenicism Barth s Christology then just might be able to open up possibilities for discussion and even convergence within a church that is anything but one

Ramified Natural Theology in Science and Religion Rodney Holder, 2020-10-15 This book offers a rationale for a new ramified natural theology that is in dialogue with both science and historical critical study of the Bible Traditionally knowledge of God has been seen to come from two sources nature and revelation However a rigid separation between these sources cannot be maintained since what purports to be revelation cannot be accepted without qualification rational argument is needed to infer both the existence of God from nature and the particular truth claims of the Christian faith from the Bible Hence the distinction between bare natural theology and ramified natural theology The book begins with bare natural theology as background to its main focus on ramified natural theology Bayesian confirmation theory is utilised to evaluate competing hypotheses in both cases in a similar manner to that by which competing hypotheses in science can be evaluated on the basis of empirical data In this way a case is built up for the rationality of a Christian theist worldview Addressing issues of science theology and revelation in a new framework this book will be of keen interest to scholars working in Religion and Science Natural Theology Philosophy of Religion Biblical Studies Systematic Theology and Science and Culture

Science and Theology James K. Dew Jr., 2011-01-17 Alister McGrath s work on the relationship between Science and Theology makes the most notable contribution to the subject written by an evangelical in recent history McGrath holds earned doctorates in both science and theology and his three volume set *A Scientific Theology* is the culmination of three decades of his work on the subject In this book James K Dew explores McGrath s contribution to the issue and highlights the benefits of adopting a critical realist perspective such as his own In particular Dew argues that McGrath s approach helps establish a unified theory of knowledge and holds significant advantages for scientists and theologians alike
