Philosophies of Integration Adrian Favell, 2016-02-17 A comprehensive comparative study of the distinct ideas and political arguments that have shaped French and British policies towards their ethnic minorities and the effects of these intellectual frameworks at local national and European levels Charting the politics and events that brought the respective institutional solutions together the author sets out the divergent conceptualisations of citizenship nationality pluralism autonomy public order and tolerance that make up the national philosophies in the two countries republican integration in France and multicultural race relations in Britain This new edition published in paperback contains a new preface bringing the volume up to date in the light of new legislation and progress Critical Cosmology Gérard Raulet, 2005-01-01 Globalization is more than an economic or geopolitical matter it is above all a new political culture Like the Kantian revolution in the 18th century our global moment urgently requires philosophical inquiry to determine if it represents a 20th century revolution in thinking Critical Cosmology takes up the task of establishing the much needed philosophical tools to think globalization by reading Kant's re foundation of cosmopolitanism as a political not moral text Raulet in committing himself to a close study of this late capitalist global moment gets us to a much needed cosmology of 21st century globalization The world's economic evolution has continually challenged some of our most basic modern concepts especially the recognition of the rights of nations This evolution has also created a need for recognizing the rights of citizens and others participating in the growth of the world's economies In neither the service of a prescriptive morality nor in the service of any one specific cultural political or intellectual ideology Gerard Raulet investigates the construction of a public space that can accommodate global citizenship Through a unique and massive genealogy of political thinkers Raulet like no other contemporary critic begins the process of carving out the social cultural and political space that will come to accommodate the common activity of an emerging global culture A brilliant and unique investigation of our contemporary political moment this will affect political thinkers of every variety and especially those who are concerned with conflict and peace studies the development of nations and nation states and human rights on a national and international scale *Demystifying the Sacred* Eveline Bouwers, David Nash, 2022-09-20 Demystifying the Sacred Blasphemy and Violence from the French Revolution to Today offers a much needed analysis of a subject that historians have largely ignored yet that has considerable relevance for today's world the powerful connection that exists between offences against the sacred and different forms of violence Drawing on cases from revolutionary France to the Russia of Vladimir Putin the international authors probe the nature and agency of local blasphemy accusations the historical and legal framework in which they were expressed and the violence both physical and symbolic accompanying them In doing so the volume reveals how cultures of blasphemy and related acts of heresy apostasy and sacrilege were a companion to or acted as a trigger for physical action but also a form of how violence was experienced More generally it shows the importance of religious sensibilities in modern society and the violent potential
