Reversal Of Multidrug Resistance In Cancer

Mahendra Rai

Reversal Of Multidrug Resistance In Cancer:

Reversal of Multidrug Resistance in Cancer John A. Kellen, 1993-12-06 This critical state of the art review brings together the scattered and often controversial information on multidrug resistance reversal Leading scientists in the field cover P glycoprotein the genetics of resistance and its reversal by drugs Resistance modifiers and modulators are tabulated and critically evaluated Reversal of Multidrug Resistance in Cancer is important reading for oncologists cancer chemotherapists and other cancer researchers

Alternative Mechanisms of Multidrug Resistance in Cancer John A. Kellen, 2012-12-06 Nullius in verba Truth will be tested not by words Horace Epistles Few read introductions except for book reviewers who want to take a shortcut and avoid reading the book itself However tradition requires that the preface make public why the book was written at all this is not supposed to include powerful reasons such as augmenting the ego of the editor and authors Frequently the inflationary tendency to publish in verbose length is in conflict with market forces and interest No doubt multidrug resistance is a fashionable topic but there are many fashions displayed on the cat walk of scientific literature One can rationalize that the forces driving our concern with multi drug resistance reflect the frustration of pharmaceutical companies and oncologists alike as soon as a new anticancer drug enters clinical trials cancer cells start eluding extinction with their elaborate and successful mechanisms Many grants have been awarded and spent only to confirm the futility of our efforts to defeat this cellular Darwinism Our medical and scientific training makes it hard if not impossible to accept that the survival of a malignant cell alone or as part of a tissue is part of the continuance of life Since exposure to noxious and lethal substances is unavoidable cells have been forced to develop a multitude of mechanisms to prevent entry or accelerate exit of such materials from intracellular space

Reversal of Multidrug Resistance in Cancer, 1994 *Drug Efflux Pumps in Cancer Resistance Pathways: From Molecular Recognition and Characterization to Possible Inhibition Strategies in Chemotherapy*, 2019-11-07 Drug Efflux Pumps in Cancer Resistance Pathways From Molecular Recognition and Characterization to Possible Inhibition Strategies in Chemotherapy Volume Seven describes the fundamental aspects of efflux pumps of the ATP binding cassette superfamily in cancer resistance pathways along with strategies to target and improve chemotherapy efficacy Pumps of the ATP binding cassette superfamily ABCs regulate the access of drugs to the intracellular space In this context the overexpression of ABCs is a well known mechanism of multidrug resistance in cancer and is associated with therapeutic failure Cancer types discussed include breast endocrine hematologic gastrointestinal musculoskeletal lung skin and central nervous system cancers The book is a valuable source for researchers and advanced students in cancer biology pharmacology pharmaceutical sciences biomaterials and medical clinical sciences that are interested in accessing a comprehensive compendium on efflux pumps in mechanisms of cancer resistance Offers comprehensive and detailed descriptions of the basic aspects of efflux pumps in a very schematic and didactic manner Describes the involvement of efflux pumps in cancer resistance in different cancer types Encompasses an updated overview

on state of the art approaches that capitalize on their inhibition to improve chemotherapy and overcome resistance

Fighting Multidrug Resistance with Herbal Extracts, Essential Oils and Their Components Mahendra Rai, 2025-02-18 Fighting Multidrug Resistance with Herbal Extracts Essential Oils and their Components Second Edition offers pharmaceutical and life sciences researchers an overview on the most relevant studies for fighting specific multidrug resistant MDR microorganisms such as bacteria protozoans viruses and fungi using natural products This new edition expands the coverage of uses of traditional medicinal plants to against MDR includes new chapters on the potential of plant derived bioactive compounds for reversal of multidrug resistances covers the use of flavonoids to combat microbes and cancer and the use of nanoparticles as drug delivery vehicle The need to combat multidrug resistant microorganisms is an urgent one This book provides important coverage of mechanism of action the advantages and disadvantages of using herbal extracts essential oils and their components and more to aid researchers in effective antimicrobial drug discovery Presents four new chapters and special focus on plant based nanoparticles Provides readers with current evidence based content aimed at using herbal extracts and essential oils in antimicrobial drug development Includes chapters devoted to the activity of herbal products against herpes AIDS tuberculosis drug resistant cancer cells and more Addresses the need to develop safe and effective approaches to coping with resistance to all classes of antimicrobial drugs *Novel Small-Molecule Agents in Overcoming Multidrug Resistance in Cancers* Qingbin Cui, Yingfang Fan, Qianxiong Zhou, Cong Wang, Leli Zeng, 2022-05-30

Drug Resistance in Leukemia and Lymphoma III G.J.L. Kaspers, R. Pieters, A.J.P. Veerman, 2012-12-06 Cellular drug resistance is a major limitation to the success of chemotherapy of leukemia and lymphoma The importance of this has now been recognized by both clinicians and scientists It is of utmost importance to bridge the gap between laboratory and clinic in this field of research This is the main purpose of the series of International Symposia on Drug Resistance in Leukemia and Lymphoma These are held every three years in Amsterdam The Netherlands since 1992 This book contains the proceedings of the third of these meetings organised in 1998 The book covers all important aspects of drug resistance in leukemia and lymphoma both in the form of extensive reviews as in manuscripts describing original data General mechanisms of resistance are discussed including the drug resistance related proteins p glycoprotein MRP multi drug resistance protein and LRP lung resistance protein and the role of glutathione and glutathione S transferases Moreover more drug type specific mechanisms of resistance are a topic such as for glucocorticoids and antifolates Much information is provided on apoptosis and its regulators and on the results of cell culture drug resistance assays Several papers focus on the modulation or circumvention of drug resistance **Reversal of Multidrug Resistance Fluorescently Measured in Single Cancer Cells Captured in the Microfluidic Chip** Avid Khamenehfar, 2015 In chemotherapy cancer cells may show resistance to a wide range of anticancer drugs a phenomenon called multidrug resistance MDR A well established cause of MDR in cancer cells involves transporter proteins such as permeability glycoprotein P gp multidrug resistance associated protein 1 MRP1 and breast

cancer resistance protein BCRP These proteins usually cause efflux of anticancer drugs such as daunorubicin DNR and paclitaxel PTX from cells leading to a reduction in cellular drug accumulation Blocking the activity of transporter proteins using MDR inhibitors is an important approach to overcome drug efflux a method called MDR reversal The overall goal of this research was to develop microfluidic chips and methods to enhance intracellular drug accumulation in MDR cells or reverse MDR To investigate MDR inhibition a microfluidic method called same single cell analysis was used to trap and measure single cells In this method drug accumulation was first measured in the trapped cell treated with anticancer drug only control experiment Then enhancement of drug accumulation was measured in the same single cell treated with the drug in the presence of a MDR inhibitor Cancer cells are usually heterogeneous This single cell method allowed us to conduct same cell analysis that overcame the issue of cell heterogeneity Our method also successfully demonstrated the enhancement of drug accumulation measured in the single cells from cryopreserved patient cells In addition the real time measurement in single cells provided time dependent kinetic information that correlated with the fold increase of drug accumulation enhancement by MDR inhibitors Most importantly a new integrated microfluidic chip was developed to select and measure rare cancer cells among many blood cells as a model of circulating tumor cells CTCs Our label free microchip was used to separate single prostate cancer cells and measure the drug accumulation enhancement by using MDR inhibitors A method of capturing a prostate cancer cell among blood cells was developed with an ultimate goal to find the appropriate MDR inhibitors to enhance cellular accumulation of anticancer drugs leading to more effective chemotherapy

Multidrug Resistance Loretta D. Ulin, 1992 **Natural Products as a Tool to Design New anti-MDR Lead Molecules** Patrícia Mendonça Rijo, Francisco Estévez, Przemysław Sitarek, Maria José U. Ferreira, 2022-01-24
