threaten habitats along the Rio Grande and many of these species are at risk of disappearing before they've even been documented. Fascinating species such as the rare Texas mesoxaea, the emerald green Aztec sweat bee, the formidable Totonac cuckoo leafcutter, or the elusive *Ptiloglossa* feather-tongued bee. Photographer and author Paula Sharp has painstakingly documented more than 100 bee species from within 45 distinct genera to produce *Native Bees of the Texas Lower Rio Grande Valley*, offering readers a rare glimpse of the region's bee life. Many of the bees shown here have never appeared in published photographs. Each species is presented in colorful detail, accompanied by floral associations and short histories summarizing entomological research conducted to date. Sharp combines formidable research skills with dazzling photographic artistry to render a guide that is comprehensive, informative, and beautiful. This richly illustrated and authoritative guide to native bee species in the Texas Rio Grande Valley will be of great interest to avocational and professional naturalists, entomologists, conservationists, apiculturists, and nature enthusiasts, especially in the region.
