Revising State Theory Essays In Politics And Postindustrialism:

Revising State Theory Fred Block,2010-04-20 An analysis of the relationship between business and the state Politics and Social Theory Will Leggett,2017-09-16 Under present social conditions neither social theorists nor political scientists can afford to ignore one another This book is a clear structured account of the relationship between politics and social theory examining both the political content of social theory and how social theory has illuminated our understanding of politics

Designing the Green Economy Brian Milani,2000-09-20 Designing the Green Economy explores realistically and in detail the world s enormous potential for human and ecological regeneration It also explains why this potential has been suppressed or distorted by industrial institutions thus creating economic crisis growing inequality and environmental destruction The first half of the book looks at the challenge ecological change has represented to capitalism as well as capitalism s repressive response the waste economy as expressed in postwar Fordist capitalism and current trends toward a globalized economy But today the great divide between waste and green economies can be narrowed by emerging legal institutional and market approaches to production and environmentalism In Part II Milani explores the practical and theoretical implications of fully unleashing these new productive forces to create community based ecological economies Milani argues that neither sustainability social justice nor economic stability can be secured without comprehensive redesign of the economy along ecological principles It looks at key sectors of the economy including manufacturing energy and money and finance to illustrate how this redesign can and is taking place through both incremental grassroots initiatives and transformative politics

Marines on the Beach Christopher Paul,2008-09-30 Paul explores both how and why U S military intervention decisions are made Pursuit of that inquiry requires the identification of decision participants thorough examination of the decision making processes they employ and recognition of several factors that influence intervention decisions the national interest legitimacy and the legacies of previous policies This book provides chapter length treatment of each of these issues The research is based on detailed historical case studies for the four U S Marines on the beach military interventions in Latin America since World War II The Dominican Republic 1965 Grenada 1983 Panama 1989 and Haiti 1994 Additional cases notably Afghanistan and Iraq enter the discussion when considering findings with broader implications Of the existing theories of governance that compete to explain government policy making Paul finds that elite theory provides the best general model for intervention decision making but that the notions of both pluralist and class theorists contribute to a complete explanation and sometimes in an unexpected way Findings also indicate considerable contribution from and constraint by institutional sources However far from finding that institutional factors are wholly deterministic this research offers support for a choice within constraints model Conclusions suggest that top decision makers especially the president enjoy wide latitude in framing the national interest and in choosing where to and where not to intervene

Making American Industry Safe for Democracy Jeffrey Haydu,1997 In Making American Industry Safe for Democracy a work of

historical sociology Jeffrey Haydu explores how basic political and economic relationships were restabilized in the aftermath of the war Haydu compares U S efforts to reconstruct an open shop regime that excluded trade unions with the reform of industrial relations in Britain and Germany Then he compares industries within the United States and traces the extraordinarily complex manner in which prewar class relations and wartime crisis led the state to restructure employee representation In this important study of new strategies for managing work and conflict that were emerging by the 1920s the author also forces us to reassess the role of organization in shaping working class mobilization and protest **The Political**

Economy of the Living Wage: A Study of Four Cities Oren M. Levin-Waldman, 2016-07-22 This book examines the movement for living wages at the local level and what it tells us about urban politics Oren M Levin Waldman studies the role that living wage campaigns may have had in recent years in altering the political landscape in four cities where they have been adopted Los Angeles Detroit Baltimore and New Orleans It is the author s belief that the living wage movements are a result of policy failure at the local level They are the by product of the failure to adequately address the changes that were occurring mainly the changing urban economic base and growing income inequality The author undertakes a scholarly analysis of the issue through the disciplinary lenses of political science while also employing some of the economists tools

States and Citizens Jon Shefner, 2015-11-16 This volume examines how states and citizens have been able to address globalization in different ways across the Global North and South Authors examine the state as it forms policies in agro production contends with critical constituencies and rebuilds capacity to act in the popular interest after forty years of neoliberal assault Postindustrial Possibilities Fred L. Block, 1990 While it is often acknowledged that we live in a

postindustrial age our economic concepts have lagged far behind our postmodern sensibility In this incisive new work the well known sociologist Fred Block sheds obsolete and shopworn economic analysis Representation Jack H. Nagel, Rogers M. Smith, 2013-07-03 In any democracy the central problem of governance is how to inform organize and represent the opinions of the public in order to advance three goals popular control over leaders equality among citizens and competent governance In most political analyses voting is emphasized as the central and essential process in achieving these goals Yet democratic representation encompasses a great deal more than voter beliefs and behavior and indeed involves much more than the machinery of elections Democracy requires government agencies that respond to voter decisions a civil society in which powerful organized interests do not dominate all others and communication systems that permit divergent voices to be heard Representation Elections and Beyond brings together leading international scholars from a wide range of disciplines to explore the twenty first century innovations in voting laws and practices in electoral systems in administrative political and civil organizations and in communication processes and new technologies that are altering how we understand democratic representation Featuring twelve essays that engage with national provincial and municipal governments across three continents this volume tackles traditional core elements of democratic representation such as voting electoral systems and

political parties while also underscoring the ways in which beliefs and preferences of citizens are influenced expressed and aggregated and the effects of those methods and practices on political agendas and policy outcomes In pinpointing deficiencies in contemporary democratic practices and possibilities for reform Representation provides an invaluable roadmap to improve democratic representation in the twenty first century Contributors Andr Blais Pradeep Chhibber Archon Fung Jacob Hacker Zoltan Hajnal Matthew Hindman David Karpf Georgia Kernell Alexander Keyssar Anthony McGann Susan Ostermann Paul Pierson Dennis Thompson Jessica Trounstein Mark E Warren The State ,2022-07-28 Written by a team of experts this text introduces all of the main competing theoretical approaches to the study of the state including pluralism Marxism institutionalism feminism green theory and more A brand new issues section enables readers to apply these key concepts and theoretical approaches to important developments in the state today This new edition offers Coverage of all key empirical and theoretical developments in the field with analysis of the impact of globalisation global financial upheavals Brexit Covid 19 and social movements such as Black Lives Matter A wide range of voices perspectives contemporary and historical examples giving readers a holistic overview of the field as well as deeper dives into key issues Brand new chapters on sovereignty security territory capital nationalism and populism Guided further reading suggestions at the end of each chapter Providing both a firm grounding in the key concepts and critical engagement with contemporary controversies and debates this text is ideal for those studying all aspects of the state
