Democratic Culture and Moral Character Jerome Braun,2013-06-03 This book returns critical theory to its roots in both psychology and the social sciences It shows some of the relationships between equality in a political and social sense and personal identity that either

relates well to such equality or rebels against it All this reflects processes of social and cultural influence that involve not only random change but also processes of social and cultural evolution that themselves have effects regarding potentials for self fulfillment and even public morality This book provides a framework to help one study the interaction between individual aspirations and social opportunities Jerome Braun known for his writings in interdisciplinary social science an approach he calls pragmatic critical theory here provides a book that discusses issues relevant to the moral underpinnings of democratic society including issues of social evolution and of culture and personality This book will be of particular interest to scholars and students of Psychology particularly in the areas of Psychology of Personality and Cultural Psychology Sociology especially those interested in Sociology of Alienation and Sociology of Culture as well as Sociology of Mental Health Anthropology particularly in the area of Psychological Anthropology Cultural Studies and Social Theory in general Dead Men's Propaganda Terhi Rantanen, 2024-05-07 In Dead Men's Propaganda Ideology and Utopia in Comparative Communications Studies Terhi Rantanen investigates the shaping of early comparative communications research between the 1920s and 1950s notably the work of academics and men of practice in the United States Often neglected this intellectual thread is highly relevant to understanding the 21st century's challenges of war and rival streams of propaganda Borrowing her conceptual lenses from Karl Mannheim and Robert Merton Rantanen draws on detailed archival research and case studies to analyse the extent and importance of work outside and inside the academy illuminating the work of pioneers in the field Some of these were well known academics such as Harold Lasswell and the authors of the seminal book *Four Theories of the Press* Others operated in the world of news agencies such as Associated Press's Kent Cooper or were marginalised as migr scholars notably Paul Kecskemeti and Nathan Leites Her study shows how comparative communications from its very beginning can be understood as governed by the Mannheimian concepts of ideology and utopia and the power play between them The close relationship between these two concepts resulted in a bias in knowledge production contributed to dominant narratives of generational conflicts and to the demarcation of Insiders and Outsiders By focusing on a generation at the forefront of comparative communications at this pivotal time in the 20th century this book challenges orthodoxies in the intellectual histories of communication studies
