Reflections on the Revolution of Our Time Harold Laski, 2017-07-05 Harold J Laski saw World War Two as a period of revolutionary change as profound as any in the modern history of the human race In his view the period s inner nature was as significant in its essentials as those which saw the fall of the Roman Empire the birth in the Reformation of capitalist society or as in 1789 the final chapter in the dramatic rise of the middle class to power All of these were not revolutions made by thinkers though some of them may have foreseen its coming but of ordinary people

who shaped the large outlines of the direction of these changes Laski held that revolutions of our time have been rooted in all that goes to give its present character to our society We can recognize its advent and prepare for it in that event we might build a civilization richer and more secure than any of which we so far have knowledge Or we may chose to resist its onset in which case it will appear to some future generation that our age has sought rather to sweep back the tides of the ocean than to oppose the decrees of men The curse of our social order is its persistent inequalities Either we must find ourselves able to co operate in their removal or we shall move rapidly to conflict about them Laski argues that the middle class must co operate with workers in essential revisions as the aristocracy was wise enough to do a century ago over the Reform Bill or violent revolution will be unleashed by means that transforms the ends of either party to the conflict in view This is the choice that lies before us Just how accurate or wide of the mark Laski was is brilliantly articulated in the critical introduction by Sidney A Pearson Jr

Relativity In Our Time Mendel Sachs, 2018-10-08 Relativity In our Time is a book concerning the relevance of Einstein s theory to human relations in contemporary times It is physics and it is philosophy It is a discussion about one of the greatest of all pillars of 20th century thought and science Based on a seminar course for a mixture of science and humanities students the approach and narrative style leads the reader towards the frontier of thinking in this farreaching subject Sachs deals with the whole spread of relativity starting from the early history of Galileo and Faraday he arrives at the foundation of the special theory There is a logical transition to the general theory while the last part of the book covers the mind testing realms of unified field theory Mach s principle and cosmology The book begins with atomistic deterministic classical physics and goes on towards a view of continuous fields of matter and a clearer view of spacetime The reader is led into Einstein s extension of this theory towards a unified force field consequently the authors address the issue of the validity of linear mathematics compared with the realism of a non linear universe Such arguments today are leading towards a new paradigm in science a study and description of nonlinear natural systems especially far from equilibrium systems their energetics and dynamics This book should be of value to postgraduates undergraduates secondary students and professionals in physics and philosophy and anyone with an interest in science subjects **Optics in Our Time**

Mohammad D. Al-Amri, Mohamed El-Gomati, M. Suhail Zubairy, 2016-12-12 Light and light based technologies have played an important role in transforming our lives via scientific contributions spanned over thousands of years In this book we present a vast collection of articles on various aspects of light and its applications in the contemporary world at a popular or semi popular level These articles are written by the world authorities in their respective fields This is therefore a rare volume where the world experts have come together to present the developments in this most important field of science in an almost pedagogical manner This volume covers five aspects related to light The first presents two articles one on the history of the nature of light and the other on the scientific achievements of Ibn Haitham Alhazen who is broadly considered the father of modern optics These are then followed by an article on ultrafast phenomena and the invisible world The third part includes

papers on specific sources of light the discoveries of which have revolutionized optical technologies in our lifetime They discuss the nature and the characteristics of lasers Solid state lighting based on the Light Emitting Diode LED technology and finally modern electron optics and its relationship to the Muslim golden age in science The book s fourth part discusses various applications of optics and light in today s world including biophotonics art optical communication nanotechnology the eye as an optical instrument remote sensing and optics in medicine In turn the last part focuses on quantum optics a modern field that grew out of the interaction of light and matter Topics addressed include atom optics slow stored and stationary light optical tests of the foundation of physics quantum mechanical properties of light fields carrying orbital angular momentum quantum communication and Wave Particle dualism in action **History in Our Time** David

Cannadine, Professor of History and Director of the Institute of Historical Research David Cannadine, 1998-01-01 Verzameling opstellen over het 19e en 20e eeuwse Groot Brittanni waarin veel bekende persoonlijkheden voor het voetlicht treden

Witness in Our Time, Second Edition Ken Light, 2010-10-05 Witness in Our Time traces the recent history of social documentary photography in the words of twenty nine of the genre s best photographers editors and curators showing how the profession remains vital innovative and committed to social change The second edition includes a new section of interviews on documentary photography in the field and an exploration of the role of photojournalism in 21st century media Witness in Our Time provides an insider s view of a profession that continues to confront questions of art and truth while extending the definitions of both America in Our Time Godfrey Hodgson, 2005 With a new afterword by the author

Peace in Our Time Sir Austen Chamberlain, 1928 World Peace in Our Time. Howard Dimond, 2022-10-01 This book World Peace in Our Time challenges us all to rethink recorded history It is a struggle to consider the logic of evolution which differs from existing records Has Humanity Stifled Advancing Wisdom At birth we are born with an open mind willing to discover the history and complexity of our many different environments As children in cultural society we learn rules to obey We are taught any number of fascinating subjects about history science language and social behaviour just to name a few
