Revolution In Military Affairs Implications For Canada And Nato:

Revolution in Military Affairs Elinor C. Sloan, 2002-04-18 Although the RMA has been the subject of much discussion in the United States for over a decade it has not received the same level of analytic attention in Canada and other NATO and allied countries Sloan examines the RMA in the context of Canada Australia France Germany and the United Kingdom in addition to assessing the transformation efforts of the United States Military She concludes that small and medium military powers such as Canada must at a minimum take selected concrete measures to maximize their military capabilities through the RMA if they are to avoid operational and political marginalisation in the promotion of international peace and security

Information and Revolutions in Military Affairs

Emily O. Goldman, 2013-09-13 Like the industrial revolution before it the information technology revolution appears to be creating a new ruling class a new economy and a new society Information technology is also transforming military operations and warfare A vast literature on the revolution in military affairs or RMA cites the important indeed dominant role of information technology in enabling a new military revolution This volume challenges conventional wisdom not by claiming that information s impact on military operations is not positive or transformative but by claiming its impact is not new Previous periods of military revolution can also be characterized as information revolutions Through the close examination of six case studies of military transformation during the industrial age the contributors to this volume demonstrate how the employment of emerging information systems was critical to realizing a major boost in military effectiveness The most successful adaptations to the new environment were made by the most skillful users of information This volume draws upon the expertise of leading military historians political scientists and defense practitioners to craft a set of original essays that provide the first retrospective examination of how information affects the process of military revolution This book was previously published as a special issue of the Journal of Strategic Studies *NATO Review*, 1999

Where Have All the Soldiers Gone? James J. Sheehan, 2009 An eminent historian offers a sweeping look at Europes tumultuous 20th century showing how the rejection of violence after World War II transformed a continent Security and Defence in the Terrorist Era Elinor Camille Sloan, Université du Québec à Montréal. Centre d'études des politiques étrangères et de sécurité, Raoul-Dandurand Chair of Strategic and Diplomatic Studies, 2005 This book assesses Canadian

security and defence requirements post September 11 *Gender and Drone Warfare* Lindsay Clark, 2019-06-20 This book investigates how drone warfare is deeply gendered and how this can be explored through the methodological framework of Haunting Utilising original interview data from British Reaper drone crews the book analyses the way killing by drones complicates traditional understandings of masculinity and femininity in warfare As their role does not include physical risk drone crews have been critiqued for failing to meet the masculine requirements necessary to be considered warriors and have been derided for feminising war However this book argues that drone warfare and the experiences of the crews exceeds the traditional masculine feminine binary and suggests a new approach to explore this issue The framework of Haunting presented here draws on the insights of Jacques Derrida Avery Gordon and others to highlight four key themes complex personhood in hyper visibility disturbed temporality and power as frames through which the intersection of gender and drone warfare can be examined This book argues that Haunting provides a framework for both revealing and destabilising gendered binaries of use for feminist security studies and International Relations scholars as well as shedding light on British drone warfare This book will be of interest to students of gender studies sociology war studies and critical security studies
