Revolution Of Our Time

Harold J. Laski

Revolution Of Our Time:

The Dilemma of Our Times (Works of Harold J. Laski) Harold J. Laski, 2014-10-24 This book originally published in 1952 unfinished and perhaps imperfect is the last book of one of the most acute political thinkers of the twentieth century Laski's earlier optimism about a swing to the Left was beginning to be reversed and in this volume he saw the defects of his previous optimistic surveys which in his opinion still had value but needed to be brought up to date and consequently he began to write an additional chapter which was never completed It remains a valuable last word of an author who for thirty years was respected and listened to on the topic of civilisation's survival through change

A Time to Speak Archibald MacLeish, 1940

Global Crisis Nadine Klopff, 2023-02-17 The book develops a novel framework for the analysis of global crises It differentiates crises on three dimensions permanent recurring and ephemeral crises This conceptualization allows us to analyze global crises not only in their immediate environment but makes it possible to understand them in the broader context of social instability The approach revolves around the terminology of discursive dislocation which provides fundamental insights into diverse forms of social instability A multidimensional conceptualization of dislocation is advanced which informs the differentiation of global crises Furthermore a methodological toolkit is developed and tailored to the theoretical framework which makes it possible to utilize the book both theoretically and methodologically for the analysis of manifold forms of global crises The book also provides a comprehensive analysis of the Covid 19 pandemic in the United States under Donald Trump Making use of the aforementioned methodology it presents a hands on illustration of how the multidimensional framework can be utilized for practical analyses The analysis reveals how the construction of the Covid 19 pandemic is embedded in the historically ingrained self portrayal of the United States and how crisis responses are invoked to serve particular socio political purposes in retaining an established vision of the United States

The Social Crisis of Our Time Wilhelm R  pke, *Values of Our Times* Deshun Li, 2013-06-01 Philosophers have gradually accepted axiology as one branch of philosophy As a basic category belonging to axiology and philosophy value is the general abstraction of concrete value formation in various fields including utility ethics and appreciation of the beauty The problem of value is essentially a problem of historical activities of practice in human society The axiology based on the scientific practice view insists on the principle of unification between theory and practice truth and value In research of axiology the relation between subjectivity and objectivity of values is a problem that must be solved in the first place The modern conversation of value philosophy is the academic and practical demands of the value philosophy research in China Value evaluation is an important part of the axiology In order to deepen the research of value philosophy and to promote the development of current value philosophy we must have scientific mode of thinking suitable for the nature of value It is the base of value relation the origin of value needs the process of value creation and actualization and the fundamental way to proving one's value as a human being

Laclau Simon Critchley, Oliver Marchart, 2004 Laclau A Critical Reader is the first full length

critical appraisal of Laclau's work and includes contributions from several leading philosophers and theorists. The first section examines Laclau's theory that the contest between universalism and particularism provides much of the philosophical background to political and social struggle, taking up the important place accorded to amongst others Hegel and Lacan in Laclau's work. The second section of the book considers what Laclau's radical democracy might look like and reflects on its ethical implications particularly in relation to Laclau's post-Marxism and thinkers such as Jürgen Habermas. The final section investigates the place of hegemony in Laclau's work, the idea for which he is perhaps best known. This stimulating collection also includes replies to his critics by Laclau and the important exchange between Laclau and Judith Butler on equality, making it an excellent companion to Laclau's work and essential reading for students of political and social theory. **Basic Trends of Our Times**

Lee Congdon, 2022-09-15. George Kennan for Our Time examines the work and thought of the most distinguished American diplomat of the twentieth century and extracts lessons for today. In his writings and lectures Kennan outlined the proper conduct of foreign policy and issued warnings to an American society on the edge of the abyss. Lee Congdon identifies the principles Kennan applied to US relations with Russia and Eastern Europe and to the Far and Near East. He takes particular note of Kennan's role in formulating postwar policy in Japan, measured response to North Korea's invasion of South Korea and opposition to the war in Vietnam. Congdon also considers Kennan's strong criticisms of his own country: its egalitarianism, unrestricted immigration and multiple addictions. He cites Kennan's call for a greater closeness to nature, a revival of religious faith and a return to the representative government established by the Founding Fathers. George Kennan for Our Time describes the often disastrous results of rejecting Kennan's counsel and the dangers international and national posed by an ongoing failure to draw upon his wisdom. In view of America's foreign policy disasters in Afghanistan, Iraq and around the world, Kennan's realist approach provides important lessons for our current age. **The Words of Our Time**

John Shosky, 2012-05-08. This is a collection of the most influential speeches given since entering the new millennium. It is a timely book capturing contemporary and powerful expressions of ideas and reasoning. Global in perspective, these speeches stand as unmediated and authentic testaments to the profound impact of great words and persuasive vision. During this period, our mindset and culture have changed, reflecting the immense national and international changes the age has witnessed: the global financial crisis, the outbreak of international terrorism, the rise of new wealth in the developing world, austerity in Europe and the United States and new opportunities for investment and influence. These speeches define our recent history and will be used by historians to understand us in the years and centuries to come. **Pro-Democracy Contention in Hong Kong**

Francis L. F. Lee, 2025-02-01. Elucidates the political dynamics that link the Umbrella Movement to the anti-extradition protests and helps explain the key character of the latter movement. Presenting an analytical account of the relational dynamics linking the 2014 Umbrella Movement and the 2019 anti

extradition protests in Hong Kong Pro Democracy Contention in Hong Kong aims to explain not only the relationship between two spectacular protest campaigns but also why the anti extradition protests exhibited a high degree of internal solidarity and public sympathy toward confrontational and at times violent protest actions The analysis moves beyond the typical focus on the peaks of social mobilization to examine the contingent and dynamic evolution of the pro democracy movement in Hong Kong Drawing upon a range of research materials including in depth interviews with protesters and leading activists surveys of protesters conducted onsite population opinion surveys systematic analyses of media materials and examination of the verdicts of protest related court cases Francis L F Lee offers theoretical insights on various important issues in the study of social movements including among others the possibility of movement transformation during abeyance the relationship between protest events and elections the role of ideological brokers in movement dynamics and the nature of spontaneous protests Readers interested in Chinese and Hong Kong politics or interested in social movement studies and analyses of political dynamics in hybrid regimes will find value in Lee s analysis
