Aliens, Robots & Virtual Reality Idols in the Science Fiction of H. P. Lovecraft, Isaac Asimov and William Gibson John L. Steadman,2020-10-30 Steadman s comprehensive guide wrestles with the concept of the alien applying cutting edge theoretical and philosophical ideas to the work of some of the greats of Science Fiction to arrive at a set of exciting new discoveries about what the genre says it means to be human Reading Aliens Robots and Virtual Reality Idols guarantees that you will never look at the writing of Lovecraft Asimov or Gibson in the same way again Dr David Simmons Senior Lecturer in English and Screen Studies University of Northampton H P Lovecraft s aliens are extra terrestrial terrestrial trans dimensional entities totally unlike any other aliens in science fiction literature In contrast Isaac Asimov s and William Gibson s aliens are human created positronic robots and virtual reality constructs or idols Lovecraft s great theme is alien indifferentism tinged with a malevolence that escalates into an existential apocalyptic threat against humankind while for Asimov and Gibson alien inclusionism is the norm The robots and the VR idols integrate into society and their influence appears to be beneficial But this is only on the surface In this book John L Steadman demonstrates that there is ultimately little difference between alien indifferentism and alien inclusionism in the fictional works of these three great writers For in fact the robots and the VR idols evolve into monsters whose actions bring about outcomes which are every bit as terrifying as anything in Lovecraft s work Humans tend to be isolates alien ated The reader is invited to question this and to consider the possibility that an alien perspective or platform might perhaps be crucial if we intend on seeing ourselves clearly and understanding exactly what it means to be human *Isaac Asimov* James Gunn,1996 Although he wrote hundreds of non fiction works about science mathematics history the Bible and literature Asimov is best known as a science fiction writer Gunn analyses his bestsellers and his contribution to the genre HSA Books and Manuscripts Dallas Auction Catalog #682 Sandra Palomino,2008

Robot Suicide Liz W. Faber,2023-05-01 In Robot Suicide Death Identity and AI in Science Fiction Liz W Faber blends cultural studies philosophy sociology and medical sciences to show how fictional robots hold up a mirror to our cultural perceptions about suicide and can help us rethink real world policies regarding mental health For decades we ve been asking whether we could make a robot live but a new question is whether a living robot could make itself die And if it could how might we humans react Suicide is a longstanding taboo in Western culture particularly in relationship to mental health marginalized identities and individual choice But science fiction offers us space to tackle the taboo by exploring whether and under what circumstances robots as

metaphorical stand ins for humans might choose to die Faber looks at a broad range of science fiction from classics like The Terminator franchise to recent hits like C Robert Cargill s novel Sea of Rust I, Asimov Isaac Asimov, 2009-12-23 Arguably the greatest science fiction writer who ever lived Isaac Asimov also possessed one of the most brilliant and original minds of our time His accessible style and far reaching interests in subjects ranging from science to humor to history earned him the nickname the Great Explainer I Asimov is his personal story vivid open and honest as only Asimov himself could tell it Here is the story of the paradoxical genius who wrote of travel to the stars yet refused to fly in airplanes who imagined alien universes and vast galactic civilizations while staying home to write who compulsively authored more than 470 books yet still found the time to share his ideas with some of the great minds of our century Here are his wide ranging thoughts and sharp eyed observations on everything from religion to politics love and divorce friendship and Hollywood fame and mortality Here too is a riveting behind the scenes look at the varied personalities Campbell Ellison Heinlein Clarke del Rey Silverberg and others who along with Asimov helped shape science fiction As unique and irrepressible as the man himself I Asimov is the candid memoir of an incomparable talent who entertained readers for nearly half a century and whose work will surely endure into the future he so vividly envisioned **Apocalyptic AI: Visions of Heaven in Robotics, Artificial**

Intelligence, and Virtual Reality Robert M. Geraci, 2010-02-05 Apocalyptic AI the hope that we might one day upload our minds into machines or cyberspace and live forever is a surprisingly wide spread and influential idea affecting everything from the world view of online gamers to government research funding and philosophical thought In Apocalyptic AI Robert Geraci offers the first serious account of this cyber theology and the people who promote it Drawing on interviews with roboticists and AI researchers and with devotees of the online game Second Life among others Geraci illuminates the ideas of such advocates of Apocalyptic AI as Hans Moravec and Ray Kurzweil He reveals that the rhetoric of Apocalyptic AI is strikingly similar to that of the apocalyptic traditions of Judaism and Christianity In both systems the believer is trapped in a dualistic universe and expects a resolution in which he or she will be translated to a transcendent new world and live forever in a glorified new body Equally important Geraci shows how this worldview shapes our culture Apocalyptic AI has become a powerful force in modern culture In this superb volume he shines a light on this belief system revealing what it is and how it is changing society *Uncovering Lives* Alan C. Elms, 1997-05-01 Psychobiography is often attacked by critics who feel that it trivializes complex adult personalities explaining the large deeds of great individuals as George Will wrote by some slight the individual suffered at a tender age say 7 when his mother took away a lollipop Worse yet some writers have clearly abused psychobiography for instance to grind axes from the right Nancy Clinch on the Kennedy family or from the left Fawn Brodie on Richard Nixon and others have offered woefully inept diagnoses such as Albert Goldman s portrait of Elvis Presley as a split personality and a delusional paranoid And yet as Alan Elms argues in *Uncovering Lives* in the hands of a skilled practitioner psychobiography can rival the very best traditional biography in the insights it offers Elms makes a strong case

for the value of psychobiography arguing in large part from example. Indeed most of the book features Elms's own fascinating case studies of over a dozen prominent figures among them Sigmund Freud the father of psychobiography B F Skinner Isaac Asimov L Frank Baum Vladimir Nabokov Jimmy Carter George Bush Saddam Hussein and Henry Kissinger. These profiles make intriguing reading. For example Elms discusses the fiction of Isaac Asimov in light of the latter's acrophobia fear of heights and mild agoraphobia fear of open spaces and Elms includes excerpts from a series of letters between himself and Asimov. He reveals an unintended subtext of *The Wizard of Oz* that males are weak females are strong think of Scarecrow Tin Man the Lion and the Wizard versus the good and bad witches and Dorothy herself and traces this in part to Baum's childhood heart disease which kept him from strenuous activity and to his relationship with his mother-in-law Matilda Joselyn Gage a distinguished advocate of women's rights. And in a fascinating chapter he examines the abused childhood of Saddam Hussein the privileged childhood of George Bush and the radically different psychological paths that led these two men into the Persian Gulf War. Elms supports each study with extensive research much of it never presented before for instance on how some of the most revealing portions of C G Jung's autobiography were deleted in spite of his protests before publication. Along the way Elms provides much insight into how psychobiography is written. Finally he proposes clear guidelines for judging high quality work and offers practical tips for anyone interested in writing in this genre. Written with great clarity and wit *Uncovering Lives* illuminates the contributions that psychology can make to biography. Elms's enthusiasm for his subject is contagious and will inspire would-be psychobiographers as well as win over the most hardened skeptics.

Up Through an Empty House of Stars David Langford, 2003-08-01 At last *Up Through an Empty House of Stars* brings together the best of the never before collected SF reviews and articles that helped build David Langford's towering reputation since 1980. Complementing the review columns collected in *The Complete Critical Assembly* and the knockabout essays and squibs in *The Silence of the Langford* this volume's 100 glittering selections mix serious critical insight with the inimitable Langford wit. In 2002 David Langford won his sixteenth Hugo award as Best Fan Writer for critical and humorous commentary on SF. In the same year his occasionally scandalous SF newsletter *Ansible* won its fifth Hugo. Langford also received the 2001 Hugo for best short story and the 2002 Skylark Award. Here he shines a unique light on classics like Ernest Bramah G K Chesterton Robert Heinlein and Jack Vance and analyses major SF and major clunkers and minor eccentrics of the 1980s 1990s and early 2000s continuing to the latest by such current stars as Gene Wolfe and China Miéville. Plus witty asides on crime fiction and its SF links gleeful examination of writing so bad it's almost good and even at his most serious turns of phrase to make you laugh aloud.

It's Been a Good Life Isaac Asimov, 2009-09-25 This new one volume autobiography spans Asimov's life for the first time condensed from three volumes by the author's wife who also shares excerpts from letters he wrote to her. Although she concludes this work with a shocking revelation about her husband's death the volume is clearly intended to be a celebration of a wonderful creative life. Illustrations: National ads
