Augmentation of Brain Function: Facts, Fiction and Controversy Mikhail Lebedev, Ioan Opris, Manuel F. Casanova, 2018-09-14 Volume I entitled Augmentation of Brain Functions Brain Machine Interfaces is a collection of articles on neuroprosthetic technologies that utilize brain machine interfaces BMIs BMIs strive to augment the brain by linking neural activity recorded invasively or noninvasively to external devices such as arm prostheses exoskeletons that enable bipedal walking means of communication and technologies that augment attention In addition to many practical applications BMIs provide useful research tools for basic science Several articles cover challenges and controversies in this rapidly developing field such as ways to improve information transfer rate BMIs can be applied to the awake state of the brain and to the sleep state as well BMIs can augment action planning and decision making Importantly BMI operations evoke brain plasticity which can have long lasting effects Advanced neural decoding algorithms that utilize optimal feedback controllers are key to the BMI performance BMI approach can be combined with the other augmentation methods such systems are called hybrid BMIs Overall it appears that BMI will lead to many powerful and practical brain augmenting technologies in the future *Aliens, Robots & Virtual Reality Idols in the Science Fiction of H. P. Lovecraft, Isaac Asimov and William Gibson* John L. Steadman, 2020-10-30 Steadman's comprehensive guide wrestles with the concept of the alien applying cutting edge theoretical and philosophical ideas to the work of some of the greats of Science Fiction to arrive at a set of exciting new discoveries about what the genre says it means to be human Reading Aliens Robots and Virtual Reality Idols guarantees that you will never look at the writing of Lovecraft Asimov or Gibson in the same way again Dr David Simmons Senior Lecturer in English and Screen Studies University of Northampton H P Lovecraft's aliens are extra terrestrial terrestrial trans dimensional entities totally unlike any other aliens in science fiction literature In contrast Isaac Asimov's and William Gibson's aliens are human created positronic robots and virtual reality constructs or idols Lovecraft's great theme is alien indifferentism tinged with a malevolence that escalates into an existential apocalyptic threat against humankind while for Asimov and Gibson alien inclusionism is the norm The robots and the VR idols integrate into society and their influence appears to be beneficial But this is only on the surface In this book John L Steadman demonstrates that there is ultimately little difference between alien indifferentism and alien inclusionism in the fictional works of these three great writers For in fact the robots and the VR idols evolve into monsters whose actions bring about outcomes which are every bit as terrifying as anything in Lovecraft's work Humans tend to be isolates alienated The reader is invited to question this and to consider the possibility that an alien perspective or platform might perhaps be crucial if we intend on seeing ourselves clearly and understanding exactly what it means to be human **Robots That Kill** Judith A. Markowitz, 2019-05-01 This book describes real world killer robots using a blend of perspectives Overviews of technologies such as autonomy and

artificial intelligence demonstrate how science enables these robots to be effective killers Incisive analyses of social controversies swirling around the design and use of killer robots reveal that science alone will not govern their future Among those disputes is whether fully autonomous robotic weapons should be banned Examinations of killers from the golem to Frankenstein's monster reveal that artificially created beings like them are precursors of real 21st century killer robots This book laces the death and destruction caused by all these killers with science and humor The seamless combination of these elements produces a deeper and richer understanding of the robots around us **An Anthropology of Robots and AI**

Kathleen Richardson,2015-02-11 This book explores the making of robots in labs at the Massachusetts Institute of Technology MIT It examines the cultural ideas that go into the making of robots and the role of fiction in co constructing the technological practices of the robotic scientists The book engages with debates in anthropological theorizing regarding the way that robots are reimagined as intelligent autonomous and social and weaved into lived social realities Richardson charts the move away from the worker robot of the 1920s to the social one of the 2000s as robots are reimagined as companions friends and therapeutic agents Apocalyptic AI: Visions of Heaven in Robotics, Artificial Intelligence, and Virtual Reality

Robert M. Geraci,2010-02-05 Apocalyptic AI the hope that we might one day upload our minds into machines or cyberspace and live forever is a surprisingly wide spread and influential idea affecting everything from the world view of online gamers to government research funding and philosophical thought In Apocalyptic AI Robert Geraci offers the first serious account of this cyber theology and the people who promote it Drawing on interviews with roboticists and AI researchers and with devotees of the online game Second Life among others Geraci illuminates the ideas of such advocates of Apocalyptic AI as Hans Moravec and Ray Kurzweil He reveals that the rhetoric of Apocalyptic AI is strikingly similar to that of the apocalyptic traditions of Judaism and Christianity In both systems the believer is trapped in a dualistic universe and expects a resolution in which he or she will be translated to a transcendent new world and live forever in a glorified new body Equally important Geraci shows how this worldview shapes our culture Apocalyptic AI has become a powerful force in modern culture In this superb volume he shines a light on this belief system revealing what it is and how it is changing society **Digital Media**

Westworld and Philosophy James B. South, Kimberly S. Engels, 2018-04-03 We can't define consciousness because consciousness does not exist Humans fancy that there's something special about the way we perceive the world and yet we live in loops as tight and as closed as the hosts do seldom questioning our choices content for the most part to be told what to do next Dr Robert Ford Westworld Have you ever
