Rock Time And Landforms:

Rock, Time, and Landforms Jerome Wyckoff, 1966 **Rocks and Landforms** John Gerrard, 2012-12-06 Geomorphology can be defined simply as the study of landforms Landforms are the result of the interaction between what Ritter 1978 has called the driving and resisting forces The driving forces or processes are the methods by which energy is exerted on earth materials and include both surface geomorphological or exogenous processes and subsurface geological or endogenous processes The resisting forces are the surface materials with their inherent resistances determined by a complex combination of rock properties Stated in these simple terms it would be expected that both sides of the equation be given equal weight in syntheses of landform evolution However this has not been the case Until about the 1950s geomorphology was mainly descriptive and concerned with producing time dependent models of landscape evolution Although the form of the land was the main focus there was little detailed mention of process and scant attention to the properties of surface materials There were of course exceptions In the late 19th century G K Gilbert was stressing the equilibrium between landforms and processes Many hydrologists were examining the detailed workings of river systems and drainage basins culminating in the classic paper of Horton 1945 *Landscapes and Landforms of Norway* Achim A. Beylich, 2020-10-04 This book discusses the striking geomorphological landscapes of mainland Norway As part of the Springer book series on World Geomorphological Landscapes it outlines the nature and diversity of Norway's geomorphological landscapes and examines the geological background and the drivers of landscape evolution It also features numerous case studies describing the most striking sites and offers insights into the status and value of geoheritage and geoconservation in the country Providing readers with an opportunity to explore the variety of Norwegian landscapes and landforms through informative texts richly illustrated with color maps and photos the book will appeal to scientists scholars and any readers interested in geology physical geography geomorphology landscape tourism geoheritage and environmental protection **Landscapes and Landforms of Nigeria** Adetoye Faniran, Lawrence Kosoko Jeje, Olutoyin A.
