urgent It would have to be a rescue mission Unbeknownst to the rest of the world China had sent its own Lunar expedition A manned expedition Until a distress call was received no human outside of China even knew that the mission was manned or that their ship had crash landed and couldn't take off again Time was running out and if the four Chinese astronauts were to be rescued the American lunar mission would have to launch immediately with only a skeleton crew Once the heroic U S astronauts were underway the army of engineers and scientists back home had the daunting task of deciding what equipment could be left on the Moon to permit the Lunar lander vehicle to lift safely from the Moon with the two U S astronauts and the four stranded Chinese taikonauts Could the U S mount such a mission successfully and would thousands of years of instilled honor allow the Chinese astronauts to accept a rescue At the publisher's request this title is sold without DRM Digital Rights Management
