Ladybird Readers Level 4 - Under the Oceans (ELT Graded Reader) Ladybird, 2024-09-05 Many animals live in the world's oceans. Find out about animals that hide, animals that live in the dark, and animals with big teeth. Ladybird Readers is a graded reading series of traditional tales, popular characters, modern stories, and non-fiction written for young learners of English as a foreign or second language. Beautifully illustrated and carefully written, the series combines the best of Ladybird content with the structured language progression that will help children develop their reading, writing, speaking, listening, and critical thinking skills. The five levels of Readers and Activity Books follow the CEFR framework and include language activities that provide preparation for the Cambridge English Young Learners (YLE) Starters, Movers, and Flyers exams. Under the Oceans, a Level 4 Reader is A2 in the CEFR framework and supports YLE Flyers exams. The longer text is made up of sentences with up to three clauses, more complex past and future tense structures, modal verbs, and a wider variety of conjunctions.

RSPB British Naturefinder Marianne Taylor, 2018-08-23 A species-by-species guide that shows you how to find and watch nearly 300 mammal, reptile, amphibian, and invertebrate species in the UK. Most wildlife books are designed to help you identify the animals you have seen. This book is different. In this new user-friendly guide, one British species is highlighted per page, and each account explains in accessible text how to find it, where to find it, and how to ensure you have the most rewarding wildlife watching experiences. Within the How to Find section, author Marianne Taylor explains the best time to look for each species, its preferred habitat, and offers tips to help make your search easier or more productive. In Watching Tips, she advises on how to get the most from your encounter, how to observe the species at length, and with luck, witness its most fascinating behaviour. A colour panel indicates each species' geographical distribution on a map, including Super Sites where the species is particularly abundant or regular. A calendar shows when each species is present or active in the UK to help you plan your visits to nature reserves. Colour photos serve as a reminder of each species' key identification features. In total, RSPB British Naturefinder features nearly 300 species and includes all British mammals, reptiles, and amphibians, along with a carefully chosen selection of other British animals of interest, such as butterflies, moths, dragonflies, spiders, and fishes.

**Transit** Edmund Cooper, 2011-09-29 It lay in the grass, tiny and white, and burning. He stooped, put out his fingers. And then there was nothing. Nothing but darkness and oblivion. A split-second demolition of the world of Richard Avery. From a damp February afternoon in Kensington Gardens, Avery is precipitated into a world of apparent unreason. A world in which his intelligence is tested by computers, and which he is finally left on a strange tropical island with three companions and a strong human desire to survive. But then the mystery deepens, for there are two moons in the sky, and the rabbits have six legs, and there is a physically satisfying reason for the entire situation.

**Closer to Stone** Simon Cleary, 2012-02-27 See the dots, boy. Can you see them? They're not even towns. Most of them. They're settlements, handfuls of human beings huddled together in the sand. Know this about your brother: he went out into that desert, and he did not come
