One of Us Barrie K Gilbert, 2019 Barrie Gilbert's fascination with grizzly bears almost got him killed in Yellowstone National Park He recovered returned to fieldwork and devoted the next several decades to understanding and protecting these often maligned giants He has spent thousands of hours among wild grizzlies in Yosemite and Yellowstone national parks Alberta coastal British Columbia and along Brooks River in Alaska's Katmai National Park where hundreds of people gather to watch dozens of grizzlies feast on salmon His research has centered on how bears respond to people and each other with a focus on how to keep humans and bears safe Drawn from his decades of experience *One of Us: A Biologist's Walk Among Bears* explodes myths that depict grizzlies as bloodthirsty beasts that kill for pleasure and reveals the intelligent adaptable side of these astonishingly social animals He also explains their pivotal role in maintaining and protecting their fragile ecosystems Accordingly Gilbert pulls no punches when outlining threats to bear conservation Most importantly this book extolls a new way of appreciating grizzly bears the same way we regard wolves whales chimpanzees and gorillas
