Constructive Dissonance Juliane Brand, Christopher Hailey, 1997-01-01 There cannot ever be too many good books about Schoenberg and so it is a special pleasure to welcome Constructive Dissonance which is far beyond just good These essays cover a generous range in style and idea Many of them also are deeply moving and nothing could be more appropriate for the composer of our century s most fiercely intense music Michael Steinberg author of The Symphony A Listener s Guide Although much has been written about Schoenberg no group of essays examines his life and work in such a broad context Here we find Schoenberg s matrix the social cultural political and artistic currents that helped shape him and to which he made his own extraordinary contribution Robert P Morgan author of Twentieth Century Music As we approach the turn of this century it is clear that Arnold Schoenberg must be counted as one of the most important figures in Western art music during the last one hundred years Schoenberg s influence on art music culture has not only worked its effects through his music but also through his thinking and writing about music This collection makes a fitting tribute to Schoenberg and does an admirable job of presenting the many facets of Schoenberg the composer music theorist and thinker These thought provoking essays present a broad range of approaches to a rich variety of topics within Schoenberg scholarship and readers will find both familiar and not so familiar issues arising during the course of the volume Constructive Dissonance is certain to become an important book for those interested in twentieth century art music and culture and seminal reading for anyone interested in Arnold Schoenberg and his work John Covach University of North Carolina at Chapel Hill

Making Musical Time Guerino Mazzola, Alex Lubet, Yan Pang, Jordon Goebel, Christopher Rochester, Sangeeta Dey, 2021-11-15 This book is a comprehensive examination of the conception perception performance and composition of time in music across time and culture It surveys the literature of time in mathematics philosophy psychology music theory and somatic studies medicine and disability studies and looks ahead through original research in performance composition psychology and education It is the first monograph solely devoted to the theory of construction of musical time since Kramer in 1988 with new insights mathematical precision and an expansive global and historical context The mathematical methods applied for the construction of musical time are totally new They relate to category theory projective limits and the mathematical theory of gestures These methods and results extend the music theory of time but also apply to the applied performative understanding of making music In addition it is the very first approach to a constructive theory of time deduced from the recent theory of musical gestures and their categories Making

Musical Time is intended for a wide audience of scholars with interest in music These include mathematicians music theorists ethno musicologists music psychologists educators therapists music performers philosophers of music audiologists and acousticians

**Time in Contemporary Musical Thought** Jonathan D. Kramer,2015-12-22 The articles in this collection create an interdisciplinary perspective While attempting no unified vision it approaches the subject from a variety of perspectives aesthetics psychology sociology ethnomusicology compositional practice and semiotics While all composers are necessarily concerned with time and while all theorists deal at least indirectly with music as a temporal phenomenon the study of musical time has been fragmented It is appropriate that no clear paradigm model or direction has yet emerged in the study of musical time since time itself is both pervasive and elusive
