Every nation can benefit from Foreign Direct Investment (FDI). It suits a country's economic development and raises citizens' living standards (Liang et al., 2021). The Kuwait International Airport Terminal 2 is also a significant project to promote overseas investment in the country. The project was intended to increase the airport's capacity and support the growing demand for air travel into the country. Ultimately, it will enhance economic growth by providing a reliable transport system, a positive sign to promote overseas businesses.

## **Role Of Foreign Direct Investment In East Asian Economic Development:**

The Role of Foreign Direct Investment in East Asian Economic Development Takatoshi Ito, Anne O. Krueger, 2007-12-01  
The international flow of long term private capital has increased dramatically in the 1990s In fact many policymakers now consider private foreign capital to be an essential resource for the acceleration of economic growth This volume focuses attention on the microeconomic determinants and effects of foreign direct investment FDI in the East Asian region allowing researchers to explore the overall structure of FDI to offer case studies of individual countries and to consider their insights both general and particular within the context of current economic theory      Multinationals and Economic Growth in East Asia Shujiro Urata, Chia Siow Yue, Fukunari Kimura, 2006-11-22  
Developing countries in East Asia recorded remarkable economic growth until the Asian financial crisis erupted in mid 1997 Although several countries experienced devastating setbacks most of them recovered to achieve reasonable rates of economic growth over the next few years Sound macroeconomic management export oriented policies and the availability of skilled and low wage labour are among the factors that contributed to the rapid economic growth before the crisis and the recovery thereafter Especially noteworthy in this regard is the role played by foreign direct investment FDI This comprehensive book identifies the factors that contributed to the expansion of FDI inflows in East Asia and the factors that enabled recipient countries to utilize FDI effectively It includes detailed case studies on China South Korea Taiwan Indonesia Malaysia the Philippines Singapore Thailand and Vietnam Also included is a comparative study of investing firms headquartered in the United States Japan and Hong Kong The authors conclude that social stability clear and effective policy implementation and corporate governance are all key factors in reaping economic success from FDI      **The Dynamics of Asian Economic Development** Hitoshi Hirakawa, Ferdinand C. Maquito, 2024-12-10  
One feature of this book is the clarification of the development mechanism of Asia as a regional economy for over half a century based on an Asian Economy Within the Global Economy approach that goes beyond the single country analytical framework The development of emerging economies has caught the world's attention from the Newly Industrializing Countries or Newly Industrializing Economies of the 1980s to the BRICs entering this century General economics cannot clarify the internal mechanism of the changing of newly industrialized economies led by Asia This book clarifies such regional development structure by focusing on the direct investments of multinational firms and the importance of gradual changes of specific policies adopted by newly industrialized economies Moreover the book concretely deals with the US China trade war and China's Belt and Road Initiative BRI as a problem of Asian economies In so doing the book not only perceives the structural change of the global economy as a structural change from a US centric global economy of the twentieth century to a China centric one but also focuses on the birthing of a new growth frontier in the world economy under a crisis brought about by a war for hegemony between the US and China The investment initiative through China's BRI has prompted the investment competition between Japan and the US which has made even stronger the

possibility of giving birth to a new economic frontier in Afro Eurasia Another feature is the consideration of various issues that confront Asian countries in their search for economic development using the Philippines as a case study The analysis of the study points to the importance of a shared growth perspective which is based on an Asian development model and discusses the challenge of overcoming the issues of the economic development model within the region At the same time this book studies the significance and new issues as a region of the economy and overseas policies of attention drawer China
