Institutions and Sustainability Volker Beckmann, Martina Padmanabhan, 2009-02-07 From the first vague idea to use Konrad Hagedorn's 60th birthday as an inspiration for taking stock of his vibrant academic contributions this joint book project has been a great pleasure for us in many ways Pursuing Hagedorn's intellectual development we have tried to reflect on the core questions of humanity according to Ernst Bloch Who are we Where do we come from and Where are we heading In this way and without knowing it Konrad Hagedorn initiated a collective action process he would have very much enjoyed if he had been allowed to take part in it But it was our aim and constant motivation to surprise him with this collection of essays in his honour Konrad Hagedorn was reared as the youngest child of a peasant family on a small farm in the remote moorland of East Frisia Germany During his childhood in the poverty ridden years after the Second World War he faced a life where humans were heavily dependent on using nature around them for their livelihoods meanwhile he learned about the fragility of the environment As a boy he tended a one room schoolhouse where his great intellectual talents were first recognised and used for co teaching his schoolmates These early teaching experiences might have laid the foundations for his later becoming a dedicated lecturer and mentor

Political Power and Economic Policy Gordon C. Rausser, Johan Swinnen, Pinhas Zusman, 2011-09-30 This book analyzes the links between political economics governance structures and the distribution of political power in economic policy making The book theoretically explains and empirically quantifies these interactions The analysis includes both public good policies and redistributive policies Part I of the book presents the conceptual foundations of political economic bargaining and interest group analysis After presenting the underlying theory Part II of the book examines ideology prescription and political power coefficients Part III analyzes a number of specific structures and Part IV presents a framework for political econometrics with a number of empirical applications and testable hypotheses In all four parts of the book four analytical dimensions of public policy are distinguished governance structures political economy mechanism design and incidence

Waste and Environmental Policy Massimiliano Mazzanti, Anna Montini, 2011 This research deals with the increasingly complex issues of waste generation waste management and waste disposal that in less developed industrialised countries present diverse but critical concerns It takes a socio economic and policy oriented perspective and provides empirical evidence at EU and regional level The EU and Italy are taken as relevant case studies given the disparities in environmental performances between less and more developed areas The rich and various empirical evidence shows that a robust delinking between waste generation and economic growth is still not present

thus future policies should directly address the problem at the source by targeting waste generation in EU countries. Some structural factors like population density and urbanisation present themselves as relevant drivers of both waste management and landfill diversion. Nevertheless, economic and structural factors alone are not sufficient to improve waste performances. Though waste policies are to be redesigned by covering the entire area of waste management, some first signals of policy effectiveness are arising. This work will be of most interest to those students of environmental economics and environmental sciences as well as policy makers, waste utility managers and companies in the waste management sector.

Trust and Supply Chains Michał Pietrzak, Joanna Domagała, Aleksandra Chlebicka, 2024-12-23. This research volume aims at outlining the substantial role of information asymmetry in agri food chains and how building trust and mitigating this problem could enhance the performance of these chains. The supply chain covers a systemic sequence of linked companies with material and information exchange. Sharing information about capabilities, inventories and needs is vital to streamline channels, reduce uncertainty and enhance performance, but economic agents may be reluctant due to opportunism. Information asymmetry can cause problems in quality assurance and distort the supply chain's functioning. Building trust is crucial and solutions include guarantees, standards, licensing and hybrid governance. *Trust and Supply Chains: Information Asymmetry in the Agri Food Sector* is based on real world examples and case studies from the agri food industry: cheese, apples, pasta and bakery, beef, organic products and more, providing practical solutions to building trust and sharing information. It offers academics, practitioners and advanced students a comprehensive overview of the various aspects of information asymmetry and trust in agri food supply chains.

Journal of Economic Literature, 2006. [Handbook on Climate Change and Agriculture](#) Ariel Dinar, Robert O. Mendelsohn, 2011-01-01. This book is a very useful resource for the lawyer; it makes a good start by presenting a wide ranging portfolio of multidisciplinary research that will assist in progressing the task, challenging though it may be.

Chris Rodgers *Environmental Liability*. This book explores the interaction between climate change and the agriculture sector. Agriculture is essential to the livelihood of people and nations, especially in the developing world; therefore any impact on it will have significant economic, social and political ramifications. Scholars from around the world and from various fields have been brought together to explore this important topic. The contributions found here analyze direct agronomic effects, the economic impacts on agriculture, agricultural impacts on the economy, agricultural mitigation and farmer adaptation. The authors argue that climate change is likely to have an extensive impact on agriculture around the world through changes in temperature, precipitation, concentrations of carbon dioxide and available water flows. This thorough and timely volume is an invaluable resource for anyone interested in exploring the impacts of climate change in arguably the most important sector of the world economy. Economists, agronomists and climate modelers in academia and the public sector, policy analysts and development agency staff and graduate/postgraduate students will find this remarkable volume a welcome addition to their collection.

Development economics between markets and institutions Erwin

Bulte,Ruerd Ruben,2023-08-28 This volume in the Mansholt series presents state of the art discussions on a wide variety of topics in the field of agricultural development More than 20 chapters have been prepared by internationally known scholars and policy analysts providing a concise overview of a variety of recent debates in development economics While the background of most contributors is in economic science the chapters are prepared so that they feed into ongoing policy discussions and are accessible to a wide readership The contributions in this volume are organized around five themes prospects for rural poverty alleviation sustainable management of natural resources strategies for enhancing food security markets and the role of the state and institutions and governance It is obvious there are many links between these themes and indeed the integration between them is emphasized in various chapters This book is prepared as a festschrift or Liber Amicorum for professor Arie Kuyvenhoven His retirement from the Development Economics Group at Wageningen University The Netherlands is a good opportunity to take stock of recent developments in the area of agricultural development economics Therefore in addition to being a valuable source of information for readers with an interest in development this volume is also intended as a farewell gift to Arie from friends and colleagues

Globalization of Food and Agriculture and the Poor

Joachim Von Braun,Eugenio Díaz-Bonilla,2008 The world agri food system is getting increasingly globalized As the majority moves into cities and those who remain in rural areas adopt urbanized lifestyles the consumption of food is changing toward varied yet similar consumption around the world This book reflects on how these changes are affecting the poor by looking at specific factors that are driving change The chapters consider different angles to the following questions How do these changes affect the roles and powers of various actors along the food chain How relevant are these trends to the economic developments within the global agri food system and in particular to the poor segments of society How is the

globalization of foods affecting human health How can international and national policy address possible adverse direct and indirect effects of globalization of the world s agri food system while strengthening positive ones The book attempts to combine both lines of inquiry focusing more specifically on the globalization of agri food systems the actual and potential impacts of these trends on the poor and the implications for food and nutrition security in developing countries *Basic Principles of Agriculture - Jejak Pustaka* Dani Lukman Hakim, Welcome to the world of agriculture where the age old practice of cultivating the land meets modern innovation and sustainability Basic Principles of Agriculture is a comprehensive guide that seeks to demystify the intricate tapestry of agricultural science from its historical roots to its cutting edge developments this book is designed to be your trusted companion on the journey to understanding and mastering the art of agriculture Throughout these pages you will find a balanced blend of theory and practical insights drawn from the collective wisdom of generations of farmers scientists and agricultural enthusiasts We emphasize the importance of sustainable practices environmental stewardship and the responsible use of resources to ensure that agriculture remains a force for good in the world Whether you are studying agriculture as an academic discipline pursuing a career in the field or simply seeking to enrich your understanding of the food you consume this book is your gateway to a world of discovery and opportunity As we embark on this educational journey together I encourage you to approach each chapter with curiosity an open mind and a commitment to applying the knowledge gained in ways that benefit both humankind and our planet Thank you for choosing this book as your companion in the exploration of the timeless and ever evolving field of agriculture *Labels of Origin for Food* Elizabeth Barham, Bertil Sylvander, 2011 This book seeks to set geographical indications GIs in the context of the overall development of today s economies and societies as marked by globalization and the interaction of cultures that this entails The book is divided into two parts The first part chapters 1 6 sets out the findings of a decade of research into GIs in Europe in the global context The second part chapters 7 10 is based on the existence of GIs as a sector in itself in the context of globalization Included in the appendixes are GI case studies in Europe and maps of protected designations of origin and geographical indications PDOs and PGIs Also included are a glossary and a subject index **OECD Rural Policy Reviews: Poland 2018** OECD, 2018-03-28 Poland has seen impressive growth in recent years and yet regional disparities in economic and social outcomes remain large by OECD standards The overall living conditions in rural communities generally remain below those of urban communities and rural households face higher poverty rates **Institutions, impact synergies and food security: a methodology with results from the Kala Oya Basin, Sri Lanka** Saleth, Rathinasamy Maria, Dinar, A., Neubert, S., Kamaiah, B., Manoharan, S., Abayawardana, Sarath, Ariyaratne, Ranjith, de Silva, S., 2007 The success of development programs depends on the role of underlying institutions and the impact synergies from closely related programs Existing literature has limitations in accounting for these critical factors This paper fills this gap by developing a methodology which can quantify both the institutional roles in impact generation and the impact synergies from related

programs The methodology is applied to the Kala Oya Basin in Sri Lanka for evaluating the impacts of three development programs and 11 institutions on food security The results provide valuable insights on the relative roles of institutions and the varying flow of impact synergies both within and across impact pathways
