The Multinational Enterprise in Developing Countries Rick Molz, Catalin Ratiu, Ali Taleb, 2013-06-25 A key distinctive feature of Multinational Enterprises MNEs as organizations resides in the fact that they span across borders This exposes them to dissimilar and often unfamiliar social and economic conditions as they venture in foreign countries MNEs from industrialized economies that are active in developing countries and emerging markets face particularly challenging hurdles due to both economic and institutional discrepancies between their home and host countries This book focuses on the uneasy interaction between the traditional logics of developing countries and the economic logic of MNEs The traditional logics of most developing countries are built around community based legitimacy and an intuitive but concrete epistemology Conversely the economic logic of MNEs from developed economies is built around technical and economic legitimacy and an abstract intellectual epistemology Unpacking the uneasy interactions between these two logics will help achieve MNEs objectives of competitiveness in developing countries as well as globally The Montreal Local Global Research Group is a well recognized research group in formulating and researching local and global issues in strategic management from the perspective of integrating divergent dominant logics into the strategy conceptualization process and this will be the first

book to be dedicated to the study of the interaction between the traditional logic of developing country and the economic logic of Multinational Enterprise MNE The cultural diversity of the contributing authors and the multidisciplinary approach offers a fresh perspective from which to explore beneficial corporate and local strategies that promote long term economic growth consistent with local traditional and cultural norms This collection will be primarily of interest to scholars of international business international development and economics Furthermore this book is immediately relevant to decision makers in Multinational corporations NGOs and political decision makers that mediate the interaction between local actors and corporate agents in developing and transitional economies Technology, Globalization, and Sustainable Development Nicholas A. Multilateral Treaty-Making Vera Gowlland-Debbas, Hassiba Hadj-Sahraoui, Nobuo Hayashi, 2021-10-18 This book focuses on the impact of social change on the rules relating to the forms and procedures of treaty making but inevitably also comes to focus on the content of the norms themselves where as in human rights and the environment they have had an impact on the form and procedure of the treaty It is of great value to all practitioners academics and policy makers involved with or interested in the treaty making process Corporate Social Responsibility, Entrepreneurship, and Innovation Kenneth Amaeshi, Paul Nnodim, Osuji Onyeka, 2013-02-15 Despite its recent popularity in literature theory and practice Corporate Social Responsibility CSR remains a vague concept that struggles to define itself beyond the confines of corporate philanthropy or sustainability In some circles it is a response to the present and anticipated climate change challenges while in others it focuses on fair trade corporate governance and responsible investment What then is CSR and how do we understand its purpose In Corporate Social Responsibility Entrepreneurship and Innovation authors Kenneth Amaeshi and Paul Nnodim consider the governance of corporate externalities positive and negative impacts of firms on society and the environment as the main thrust of the CSR discourse a field that hitherto only the state has regulated with sometimes coercive actions This book contributes to the theorization of CSR by presenting the meaning of CSR in a clear and distinct manner giving the ongoing CSR debate a new direction anchored on a firm economic philosophy It reinforces the view of firms as social institutions as well as economic actors establishing CSR as a form of justice rather than philanthropy Articulating CSR as private governance of corporate externalities for the first time this book provides researchers with a new paradigm to translate knowledge into action and offers reflective managers an alternative framework in which to explore their corporate strategies and decisions *Multinational Enterprise Management Strategies in Developing Countries* Khan, Mohammad Ayub, 2016-05-16 In contemporary economies businesses must consistently make strides to remain competitive and profitable at both national and international levels Unlike in the developed world corporations in developing nations face

Subramanian Rangan,Robert Z. Lawrence,2011-10-01 The unprecedented shifts in the U S dollar s exchange rate that started during the late 1970s and continued through the 1980s provide an ideal opportunity to explore how the global economy works and the role that multinational enterprises MNEs play in the phenomenon of globalization In this book Subramanian Rangan and Robert Z Lawrence examine the international pricing sourcing and trade responses of MNEs to shifts in the dollar Based upon the micro patterns they observe in MNE behavior the authors suggest explanations for some puzzling macro patterns evident in our international economy They conclude that the global integration of markets remains incomplete due to informational and other important discontinuities and they refute stereotypes which portray multinational firms as either footloose or inflexible Policy implications for exchange rates trade and foreign direct investment are also discussed Globalization Yea Jee Bae,2018-12-15 The advancement of transportation and communication technology has facilitated greater interaction between people throughout the world a process known as globalization Because of its various economic social cultural and environmental implications attitudes

toward globalization are ambivalent There are concerns about the exploitation of people and resources from less economically stable countries and the destruction of cultural traditions but at the same time it has allowed the world to open up for people on an international scale It is important to weigh the many costs and benefits of this complicated issue to form a reasoned response which this book adeptly supports

Peter Buckley,2014-01-02 Business History and International Business are cognate subjects There are few if any studies of international business that do not require a proper study of context International business decision making must be made relevant by a considered evaluation of the circumstances surrounding that decision This often means putting it into its historical context The contributions that the study of international business can make to business history are the input of appropriate theory and appropriate research methods The best international business theory can illuminate the seemingly disparate strategies of firms in given historical circumstances and can provide an integrated overarching conceptual structure of the study of business history The research methods used in international business are also worthy of scrutiny by business historians The proposition of this book is that international business theory and method can complement business history This cross fertilization has been occurring with increasing regularity over the past few decades and this book brings together some of the fruits of this conjunction of two important intellectual domains This book was published as a special issue of Business History **The Conflicted Superpower** Andrew Kennedy,2018-05-22 For decades leadership in

technological innovation has sustained U S power worldwide Today however processes that undergird innovation increasingly transcend national borders Cross border flows of brainpower have reached unprecedented heights while multinationals invest more and more in high tech facilities abroad In this new world U S technological leadership increasingly involves collaboration with other countries China and India have emerged as particularly prominent partners most notably as suppliers of intellectual talent to the United States In The Conflicted Superpower Andrew Kennedy explores how the world s most powerful country approaches its growing collaboration with these two rising powers Whereas China and India have embraced global innovation policy in the United States is conflicted Kennedy explains why through in depth case studies of U S policies toward skilled immigration foreign students and offshoring These make clear that U S policy is more erratic than strategic the outcome of domestic battles between competing interests Pressing for openness is the high tech community the technology firms and research universities that embody U S technological leadership Yet these pro globalization forces can face resistance from a range of other interests including labor and anti immigration groups and the

nature of this resistance powerfully shapes just how open national policy is Kennedy concludes by asking whether U S policies are accelerating or slowing American decline and considering the prospects for U S policy making in years to come
