## **Role Of The Military In Underdeveloped C:**

*Role of the Military in Less Developed Countries* United States. Department of State. External Research Staff,1964

*Guarding the Guardians* Mathurin C. Houngnikpo,2016-04-22 The relationship between civil society and the armed forces is an essential part of any polity democratic or otherwise because a military force is after all a universal feature of social systems Despite significant progress moving towards democracy among some African countries in the past decade all too many African militaries have yet to accept core democratic principles regulating civilian authority over the military This book explores the theory of civil military relations and moves on to review the intrusion of the armed forces in African politics by looking first into the organization and role of the army in pre colonial and colonial eras before examining contemporary armies and their impact on society Furthermore it revisits the various explanations of military takeovers in Africa and disentangles the notion of the military as the modernizing force Whether as a revolutionary force as a stabilizing force or as a modernizing force the military has often been perceived as the only organized and disciplined group with the necessary skills to uplift newly independent nations The performance of Africa s military governments since independence however has soundly disproven this thesis As such this study conveys the necessity of new civil military relations in Africa and calls not just for civilian control of the military but rather a democratic oversight of the security forces in Africa

*U.S. Security, Arms Control, and Disarmament 1961-1965* United States. Department of Defense,1965

**Military Industry and Regional Defense Policy** Timothy D.

Hoyt,2017-07-05 Military Industry and Regional Defense Policy re examines military industrialization in the developing world focusing on policy making in producer states and the impact of security perceptions on such policy making Timothy D Hoyt reassesses the role of regional state sub systems in international relations and recent historical studies of international technology and arms transfers Looking at Israel Iraq and India the three most powerful regional powers in the Cold War era he presents an expert analysis of the three sided phenomena of the regional hegemony the regional competitor and the small over achiever This new book breaks away from existing literature on military industries in the developing world which has focused on their economic and development costs and benefits These past studies have used primitive methodologies that focus on the production of complete weapons systems a misleading gauge in a world of growing international defense cooperation They have also ignored empirical evidence of the impact of local military industrial production on Cold War regional conflict and of the defence planning and concerns that drove development of indigenous military industries in key regional powers This new text delivers an incisive new perspective *The Role of the Military in Underdeveloped Countries*
