

Chemical Mediators

- The initial “macrophage (APC cell) – antigen complex” causes chemical mediators to be released:
 - Histamine
 - From basophils & mast cells
 - Cause vasodilation & increased permeability of vessels via release of nitric oxide
 - Prostaglandins
 - Made in mast cell membrane from fatty acid (arachidonic)
 - Cause pain & vasodilation
 - Leukotrienes
 - “bad” prostaglandins since cause symptoms of inflammation (pain & swelling)
 - Cause chemotaxis
 - Very important for causing allergies, asthma, & anaphylaxis

Role Of Chemical Mediators In The Pathop:

Pathophysiology Carie Ann Braun, Cindy Miller Anderson, 2007 This pathophysiology text offers a unique conceptual approach that facilitates learning by viewing pathophysiology as health care professionals do. Students will learn about general mechanisms of disease or alterations in human function such as immune alterations or altered nutrition and apply these processes to specific conditions. Chapters focus on fifteen core concepts of altered human function selected by analyzing and clustering health conditions with high prevalence, incidence, and severity. Unlike a traditional systems-based approach, this novel approach shows how most diseases involve multiple body systems. A bound in CD-ROM includes animations and an interactive game. Faculty resources include lesson plans, PowerPoint slides, additional case studies, and student assignment worksheets. Principles of Pathophysiology Shane Bullock, Majella Hales, 2012-09-20 **TAKING IT TO THE WARD** *Principles of Pathophysiology* has been specifically written for local nursing and Allied Health students with the aim of clearly integrating the science of Pathophysiology with clinical practice within Australia and New Zealand. Taking a systems approach to help facilitate stronger understanding, this new Australian text is the perfect learning resource for Nursing and Allied Health students. *Surgical Pathophysiology* A. Aasen, 1991-05-13 *Pathophysiology of the Enteric Nervous System* Robin Spiller, David Grundy, 2008-04-15 Over the last few years there have been huge advances made in our understanding of the interactions between the brain and the gut, the enteric nervous system. This book is particularly relevant in the understanding, diagnosis, and management of irritable bowel syndrome, the most common functional disorder of the bowel. IBS has been diagnosed in 10-20% of adults in the US, and symptoms of IBS are responsible for more than 3 million visits to the physician in the US. This book is aimed at specialist gastroenterologists but also should be of interest for trainees and fellows in gastroenterology as well as PCPs and GPs with an interest in this subject. *The Role of Chemical Mediators in the Pathophysiology of Acute Illness and Injury* Rita McConn, 1982-01-01
