Mitchell, David Heaton, Caroline Henckels, 2016-12-30 Central to this book is an analysis of the obligation upon states to ensure non discrimination in the form of adherence to the principles of national treatment and most favoured nation treatment These are critical principles for both international trade law and international investment law yet the case law in both fields reveals significant inconsistencies regarding key elements of non discrimination Tribunals have invoked regulatory purpose to assist in identifying relevant discrimination but have done so without offering a definition of regulatory purpose and in significantly differing ways This book explains these inconsistencies and offers a new definition of regulatory purpose **China's Growing Role in World**

**Trade** Robert C. Feenstra, 2010-03-10 In less than three decades China has grown from playing a negligible role in international trade to being one of the world's largest exporters a substantial importer of raw materials intermediate outputs and other goods and both a recipient and source of foreign investment Not surprisingly China's economic dynamism has generated considerable attention and concern in the United States and beyond While some analysts have warned of the potential pitfalls of China's rise the loss of jobs for example others have highlighted the benefits of new market and investment opportunities for US firms Bringing together an expert group of contributors China's Growing Role in World Trade undertakes an empirical investigation of the effects of China's new status The essays collected here provide detailed analyses of the microstructure of trade the macroeconomic implications sector level issues and foreign direct investment This volume's careful examination of micro data in light of established economic theories clarifies a number of misconceptions disproves some conventional wisdom and documents data patterns that enhance our understanding of China's trade and what it may mean to the rest of the world The World Trade Organization Mitsuo Matsushita, Thomas J. Schoenbaum, Petros C. Mavroidis, Michael Hahn, 2015-10-15

The WTO is one of the most important intergovernmental organizations in the world yet the way in which it functions as an organization and the scope of its authority and power are still poorly understood This comprehensively revised new edition of the acclaimed work by an outstanding team of WTO law specialists provides a complete overview of the law and practice of the WTO The authors begin with the institutional law of the WTO such as the sources of law and remedies of the dispute settlement system then tackle the principal substantive obligations of the WTO regime including tariffs quotas and MFN They then move on to consider unfair trade regional trading arrangements and developing countries In its final section the book deals with the consequences of globalization first where free trade is seen to be incompatible with environmental protection and second where WTO law confronts legal regimes governing issues of competition and intellectual property *The World Trade Organization International Trade Law*

Center, Arthur E. Appleton, Michael G. Plummer, 2007-12-31 The editors have succeeded in bringing together an excellent mix of leading scholars and practitioners No book on the WTO has had this wide a scope before or covered the legal framework economic and political issues current and would be countries and a outlook to the future like these three volumes do 3000 pages 80 chapters in 3 volumes cover a very interdisciplinary field that touches upon law economics and politics

**Preferential Trade Agreements and Their Role in World Trade** Denis Medvedev, 2006 The author investigates the effects of preferential trade agreements PTAs on bilateral trade flows using a comprehensive database of PTAs in force and a detailed matrix of world trade He shows that total trade between PTA partners is a poor proxy for preferential trade trade in tariff lines where preferences are likely to matter while the former amounted to one third of global trade in 2000 02 the latter was between one sixth and one tenth of world trade His gravity model estimates indicate that using total rather than preferential trade to assess the impact of PTAs leads to a significant downward bias in the PTA coefficient The author finds

that product exclusions and long phase in periods significantly limit preferential trade and their removal could more than double trade in tariff lines above 3 percent of most favored nation MFN duties He also shows that the effects of PTAs on trade vary by type of agreement and are increasing in the incomes of PTA partners      **World Trade Law** Simon Lester, Bryan Mercurio, Arwel Davies, 2018-02-22 This third edition of one of the leading textbooks on world trade law offers what is in a number of ways a unique perspective on this important subject Combining the best aspects of both casebook and treatise this comprehensive textbook provides detailed explanations and analysis of the law to help understand the issues as well as case extracts to offer a flavour of the judicial reasoning of trade adjudicators Moreover the book is truly global in outlook being equally useful for students of international trade law in the UK Europe the US Asia and elsewhere around the world This updated edition includes in depth discussions of the most recent developments in international trade jurisprudence setting out important precedents that help establish the boundaries between global trade rules and domestic national autonomy In this era when political developments place even more importance on international trade it will be essential reading for all students scholars and practitioners in the field      Reconstructing the World Trade Organization for the 21st Century Kent Albert Jones, 2015 Reconstructing the World Trade Organization for the 21st Century explores the reasons for the WTO s failure to achieve comprehensive multilateral trade liberalization in the new 21st century global economy The solution to the problem must come from institutional reforms that can promote global agreement on achieving the gains from trade      **World Trade Organization** Elizabeth Sirois, Nina Pfeiffer, 2002-02 In Nov 2001 the WTO launched a new set of multilateral negotiations It laid out an ambitious agenda for a broad set of new multilateral trade negotiations which calls for a continuation of discussions on liberalizing trade in ag and services which began in 2000 It also provides for new talks on market access for non ag products trade and the environ trade related aspects of intellectual property rights and other issues This report 1 analyzes the factors that contributed to the successful launch of new WTO negotiations 2 analyzes the key interim deadlines for the most sensitive issues from the present time through the next ministerial conference in 2003 and 3 evaluates the most significant challenges facing the WTO in the overall negotiations      *The Role of the Judge in International Trade Regulation* Thomas Cottier, Petros Constantinou Mavroidis, Patrick Blatter, 2009-12-22 The WTO is generally seen as a key actor of globalization and as such has been the point of convergence of popular irritation worldwide Many of the reproaches addressed to the WTO show civil societys concern with what is perceived as a democratic deficit in the way the organization operates The main fear is to see trade rise as the ultimate value prevailing over concerns such as health and environment The Role of the Judge offers insight into how disputes are solved at the WTO level into how the judicial branch interacts with the rest of the organization and into the degree of sensitivity of the system to external input The book sheds light on the judicial system governing the WTO and shows it to be the only truly multilateral system where disputes are solved by third party adjudication The book develops along three lines the first a search for cases submitted to

the WTO where the judge exceeded its authority the second a comparison of the WTO with the operations of national judicial systems having different levels of integration specifically the United States federal level and the EC quasi federal level and the third an exploration of directions for the future of dispute settlement in the WTO Reflecting the diversity of its contributors this book addresses questions of economics political science and law bringing an unusual level of multidisciplinary to this topic and context It is designed for both academic readers and practitioners who will find it full of practical insights as well as rich and detailed analysis Thomas Cottier is Professor of European and International Economic Law University of Bern and Managing Director World Trade Institute University of Bern Petros C Mavroidis is Professor of Law University of Neuchâtel He formerly worked in the Legal Affairs Division of the World Trade Organization Patrick Blatter is Mavroidis's scientific collaborator

**Financial Stability, Economic Growth, and the Role of Law** Douglas W. Arner, 2007-06-04 Financial crises have become an all too common occurrence over the past twenty years largely as a result of changes in finance brought about by increasing internationalization and integration As domestic financial systems and economies have become more interlinked weaknesses can significantly impact not only individual economies but also markets financial intermediaries and economies around the world This volume addresses the twin objectives of financial development in the context of financial stability and the role of law in supporting both Financial stability frequently seen as the avoidance of financial crisis has become an objective of both the international financial architecture and individual economies and central banks At the same time financial development is now seen to play an important role in economic growth In both financial stability and financial development law and related institutions have a central role

**Dispute Settlement in the World Trade Organization** David Palmeter, Petros C. Mavroidis, Niall Meagher, 2022-02-17 Provides a comprehensive step by step explanation of the rules and procedures of the WTO dispute settlement process

**Legal, Political and Economic Strategies of Subsidies within the World Trade Organization** Juliana Marteli Fais Feriato, 2024-11-01 From the Law and Economics perspective the book reveals the gaps of the trade multilateral system that allows governments to draw upon subsidies strategies according to their unilateral interests The book suggests

that failures in WTO mechanisms has become great challenge for the multilateral system to restrain trade diversion Due to their character as public expenditures since they are granted by governments through tax incentives or direct financial investment granting subsidies are directly linked to the economic power of the countries For this reason some subsidies constitute a serious unfair trade practice that needs to be fought multilaterally depending on global cooperation so that all countries can have access to international trade Poor countries are severely affected by theses practices meanwhile not all developing countries are impacted the same way because there are considerable levels of development Based on this the book proposes a preventive mechanism to discourage subterfuge and opportunism of rich countries in search of efficiency In order to do so firstly it will be addressed the economic theories that underlie free trade and the subsidies influence over international economy Next the Law and Economics approach will be presented by which the problematic economic and political subsidy strategies of member countries will be analyzed Based on these premises the book shows how subsidies and countervailing measures are regulated within the WTO and it points out the failures of the WTO mechanisms to combat specific subsidies which accentuate the differences between rich and poor countries Finally the book proposes preventive measures to hinder harmful effects of subsidies from materializing *Asymmetric Power Relations and International Trade Law* Inebu C. Agbo-Ejeh, 2024-12-31 The book offers an analysis of the contradictions between theory and practice in the trading system It contextualises the colonial legal structure and its impact on the peripheral countries and their participation and gain in the multilateral trading system The book s core argument effectively situates Economic Partnership Agreements in the systemic asymmetry which characterises the relationship between developed and developing countries in global trade It applies the idea of asymmetry to the relationship between the core countries the EU USA and the peripheral countries ACP in the GATT multilaterally and in the EU ACP trade relationship bilaterally The book identifies that core provisions in the WTO regime such as the special and differential treatment as well as GATT Article XXIV have not lived up to expectations Underscoring the asymmetrical participation and dominant role of former colonial powers the book demonstrates how although trade is generally considered a catalyst for economic growth developed countries have safeguarded their domestic markets while exerting pressure on developing countries to liberalise and compete The European Union has taken measures to address the development concerns of African Caribbean and Pacific countries through the Lom Conventions and Cotonou Agreement however these relationships still retain and reinforce colonial paternalism evidenced by recent trade agreements An alternative possibility multipolarity holds promise for African countries especially intra African trade and critical engagement with China The book is an invaluable resource for scholars postgraduate students government officials and policymakers as it offers a comprehensive understanding of the complexities of trade negotiations and agreements Free Trade and Cultural Diversity in International Law Jingxia Shi, 2013-04-30 This book attempts to reconcile the concept of free trade with a key non trade social value cultural diversity in an era of economic globalisation It first shows how we can look at

culture in many different ways and explains why we should care about cultural diversity The book then examines the challenges that policymakers are faced with in formulating cultural measures in the new media environment and analyses UNESCO s theories and approaches to cultural diversity This is followed by a comprehensive examination of the treatment of culture in global and regional trade agreements including the framework of the GATT WTO system the WTO s judicial practice involving cultural products and the treatment of culture under the EC EU and NAFTA This identifies the challenges trade norms encounter in dealing with cultural products The author seeks to formulate a balanced view of the challenge of protecting and promoting cultural diversity while also recognising the important goal of trade liberalisation To this end Professor Shi proposes a dual method through which the norms found in WTO agreements and in UNESCO cultural instruments may be brought into alignment the first highlighting the compatibility of cultural policy measures with trade obligations on a domestic level the second suggesting potential linkages between the WTO rules and the UNESCO Convention from the perspectives of treaty interpretation
