Roller Compacted Concrete Dams:

Roller-compacted Concrete Dams Kenneth D. Hansen, William G. Reinhardt, 1991 Roller compacted concrete RCC represents a major advance in dam building technology The RCC method speeds construction reduces the costs of building without compromising safety This work focuses on the cutting edge of RCC design technology describing the costs benefits of a variety of technical approaches offering an extensive survey of completed RCC dams the participants involved in building them *Roller-Compacted Concrete Dams* CIGB ICOLD, 2020-12-14 ICOLD Bulletin 177 Roller Compacted Concrete Dams presents the state of the art on roller compacted concrete technology for dams incorporating the advances of the RCC technology for dams over the last 15 years since the previous Bulletin on the topic was released in 2003 Hence the present ICOLD Bulletin 177 supersedes ICOLD Bulletin 126 Roller compacted concrete dams State of the art and case histories published in 2003 and ICOLD Bulletin 75 Roller Compacted Concrete for Gravity Dams published in 1989 While roller compacted concrete technology could have still been considered a new technology in 2003 it is now true to say that construction by roller compaction has become the standard approach for large concrete gravity dams This Bulletin addresses all aspects of the planning design construction and performance of RCC in dams Mixture proportioning and quality control are discussed and a comprehensive listing of references is included Many aspects of RCC in dams have become better understood since the publication of Bulletin No 126 and the present Bulletin contains less information on the particular approaches applied in different countries but includes more comprehensive information particularly in relation to design mixture proportioning and construction With greater understanding it has further been possible to highlight more definitively the requirements of successful RCC dams as well as the pitfalls and difficulties that can be associated with RCC dam design and construction Le Bulletin CIGB 177 intitul Barrages en B ton Compact au Rouleau pr sente les derni res avanc es en mati re de technologie du b ton compact au rouleau pour les barrages int grant les progr s de la technologie BCR pour les barrages au cours des 15 derni res ann es depuis que le dernier bulletin sur le sujet a t publi en 2003 Par cons quent le bulletin 177 remplace le bulletin 126 Barrages en b ton compact au rouleau Technique actuelle et exemples publi en 2003 et le bulletin 75 B ton compact au rouleau pour barrages poids Technique actuelle publi en 1989 Alors que la technologie du BCR pourrait encore tre consid r e comme une nouvelle technologie en 2003 il est maintenant vrai de dire que la construction par le compactage par rouleaux est devenue l approche standard pour les grands barrage poids en b ton Ce bulletin aborde tous les aspects de la planification de la conception de la construction et de la performance du BCR dans les barrages Le dosage du m lange et le contr le de la qualit sont discut s et une liste exhaustive des r f rences est incluse De nombreux aspects du BCR dans les barrages sont mieux compris depuis la publication du Bulletin no 126 Le pr sent bulletin contient moins d informations sur les approches particuli res appliqu es dans diff rents pays mais comprend des informations plus compl tes notamment en ce qui concerne la conception le dosage du m lange et la construction Avec une plus grande

compréhension il a été possible de mettre en évidence les exigences des barrages en BCR russes ainsi que les pièges et les difficultés qui peuvent être associés à la conception et la construction du barrage en BCR *Roller-compacted Concrete*, 2005
