Lost at Sea Ronald Pearsall, 1996 Over 120 illustrations From ancient times to the present day marine disasters have been a fact of everyday life Accidents at sea occur for many reasons collisions explosions poor navigation bad ship design violent storms and sometimes just plain bad luck The shipwrecks depicted in this book reveal through both image and text the dire consequences of these disasters as well as the formidable power of nature over men Journeying far and wide this volume illustrated with 124 full color illustrations covers the multitude of stories behind these catastrophes and examines naval design throughout the ages

Out of the Depths Alan G. Jamieson, 2024-08-12 A highly illustrated voyage through shipwrecks ancient and contemporary Out of the Depths explores all aspects of shipwrecks across four thousand years examining their historical context and significance showing how shipwrecks can be time capsules and shedding new light on long departed societies and civilizations Alan G Jamieson not only informs readers of the technological developments over the last sixty years that have made the true appreciation of shipwrecks possible but he also covers shipwrecks in culture and maritime archaeology their appeal to treasure hunters and their environmental impacts Although shipwrecks have become less common in recent decades their implications have become more wide ranging since the 1960s foundering supertankers have caused massive environmental disasters and in 2021 the blocking of the Suez Canal by the giant container ship Ever Given had a serious effect on global trade

Ancient Ocean Crossings Stephen C. Jett, 2017-06-06 Paints a compelling picture of impressive pre Columbian cultures and Old World civilizations that contrary to many prevailing notions were not isolated from one another In Ancient Ocean Crossings Reconsidering the Case for Contacts with the Pre Columbian Americas Stephen Jett encourages readers to reevaluate the common belief that there was no significant interchange between the chiefdoms and civilizations of Eurasia and Africa and peoples who occupied the alleged terra incognita beyond the great oceans More than a hundred centuries separate the time that Ice Age hunters are conventionally thought to have crossed a land bridge from Asia into North America and the arrival of Columbus in the Bahamas in 1492 Traditional belief has long held that earth's two hemispheres were essentially cut off from one another as a result of the post Pleistocene meltwater fed rising oceans that covered that bridge The oceans along with arctic climates and daunting terrestrial distances formed impermeable barriers to interhemispheric communication This viewpoint implies that the cultures of the Old World and those of the Americas developed independently Drawing on abundant and concrete evidence to support his theory for significant pre Columbian contacts Jett suggests that many ancient peoples had both the seafaring capabilities and the motives to cross the oceans and in fact did so repeatedly and with great impact His deep and broad work synthesizes information and ideas from archaeology geography linguistics climatology oceanography ethnobotany genetics medicine and the history of navigation and seafaring making an innovative and persuasive multidisciplinary case for a new understanding of human societies and their diffuse but interconnected development
