Taíno Indian Myth and Practice William F. Keegan, 2022-05-03 Applying the legend of the stranger king to

Caonabo the mythologized Taino chief of the Hispaniola settlement Columbus invaded in 1492 Keegan examines how myths come to resonate as history created by the chaotic interactions of the individuals who lived the events of the past as well as those who write and read about them The stranger king story told in many cultures is that of a foreigner who comes from across the water marries the king's daughter and deposes the king In this story Caonabo the most important Taíno chief at the time of European conquest claimed to be imbued with Taino divinity while Columbus determined to establish a settlement called La Navidad described himself as the Christbearer Keegan's ambitious historical analysis knitting evidence from Spanish colonial documents together with data gathered from the archaeological record provides a new perspective on the encounters between the two men as they vied for control of the settlement a survey of the early interactions of the Tainos and Spanish people and a complex view of the interpretive role played by historians and archaeologists Presenting a new theoretical framework based on chaos and complexity theories this book argues for a more comprehensive philosophy of archaeology in which oral myths primary source texts and archaeological studies can work together to reconstruct a particularly rich view of the past A volume in the Florida Museum of Natural History Ripley P Bullen Series

Socio-Cultural Perspectives on Science Education W.W. Cobern, 2012-12-06 Global science education is a reality at the end of the 20th century albeit an uneven reality because of tremendous technological and economic pressures Unfortunately this reality is rarely examined in the light of what interests the everyday lives of ordinary people rather than the lives of political and economic elites The purpose of this book is to offer insightful and thought provoking commentary on both realities The tacit question throughout the book is Whose interests are being served by current science education practices and policies The various chapters offer critical analysis from the perspectives of culture economics epistemology equity gender language and religion in an effort to promote a reflective science education that takes place within rather than taking over the important cultural lives of people The target audience for the book includes graduate students in education science education and education policy professors policy and government officials involved with education Hunting for Sustainability in Tropical Forests John Robinson, Elizabeth L. Bennett, 2000-02-08 Throughout the world people are concerned about the demise of tropical forests and their wildlife Hunting by forest dwelling people has a dramatic effect on wildlife in many tropical forests frequently driving species to local extinction with devastating implications for other species and the health of the forests themselves But wildlife is an important source of protein and cash for rural peoples Can hunting be managed to conserve biological communities while meeting human needs Are hunting rates as practiced by tropical forest peoples sustainable If not what are the biological social and cultural implications of this failure Answering these questions is ever more important as national and international agencies seek to integrate the development of local peoples with the conservation of tropical forest systems and species This book presents a wide array of studies that examine the sustainability of hunting as practiced by rural peoples Comprising work by both biological and social scientists Hunting for Sustainability in

Tropical Forests provides a balanced viewpoint on the ecological and human aspects of this hunting The first section examines the effects of hunting on wildlife in tropical forests throughout the world The next section looks at the importance of hunting to local communities The third section looks at institutional challenges of resource management while the fourth draws on economic perspectives to understand both hunting and sustainability A final section provides synthesis and summary of the factors that influence sustainability and the implications for management Drawing on examples from Ecuador to Congo Zaire to Sulawesi Hunting for Sustainability in Tropical Forests will be a valuable resource to policymakers conservation organizations and students and scholars of biology ecology and anthropology Votives, Places, and Rituals in Etruscan Religion

Margarita Gleba,Hilary Becker,2009 By considering votive mortuary and secular rituals the volume offers a contribution to the continued study of Etruscan culture and gathers new material interpretations and approaches to the less emphasized areas of Etruscan religion Gender Roles in the Future? Theoretical Foundations and Future Research Directions Alice H. Eagly,Sabine Sczesny,2019-11-01 The study of gender is deservedly a major focus of research in the discipline of psychology in general and social psychology in particular Interest in the topic increased sharply in the 1970s with the flowering of the feminist movement and research has continued to advance since that time In 1987 Alice Eagly formulated Social Role Theory to explain the behavior of women and men as well as the stereotypes attitudes and ideologies that are relevant to sex and gender Enhanced by several extensions over the intervening years this theory became one of the pre eminent if not the central theory of gender in social psychology Also over the last decades social psychologists have developed a variety of related approaches to understanding gender including for instance theories devoted to stereotyping leadership status backlash lack of fit to occupational roles social identity and categorization Reflecting these elements this e Book includes articles that encompasses a wide range of themes pertaining to sex and gender In these papers the concept of social roles appears often as central integrative concept that links individuals with their social environment These articles thereby complement social role theory as the authors reach out to build an extended theoretical foundation for gender research of the future *H.R. 3131, the National High-Performance Computing Technology Act* United States.
