O. Grenby, Andrea Immel, 2009-12-10 A wide ranging introduction to an exciting and rapidly expanding field *Margaret Wise Brown's Experimental Art* Julia Pond, 2024-09-25 In this study the engaging art created by children's author Margaret Wise Brown receives the critical attention it deserves as a lasting contribution to American children's literature Through analysis of her dozens of titles published during the height of western Modernism this scholarly text shares Brown's importance and

impact from the perspective of Brown's work rather than biographically. Moving beyond such popular titles as *Goodnight Moon* and *The Runaway Bunny* into deeper cuts reveals how Brown's oeuvre bridges multiple disciplines including writing, visual art, philosophy, and music. Her projects successfully experiment with artistic collaboration and synesthesia as a natural expression for a child readership while both contributing to and reflecting high Modernism amidst the two World Wars. The quality of Brown's writing and the maturity of her themes reveal respect for her child audience and recommend her work to the generations of readers who followed her early death. As this book demonstrates, Margaret Wise Brown remains one of the truly great authors of children's literature.

Using Trauma-Focused Therapy Stories Pat Pernicano, 2021-08-29

Using Trauma Focused Therapy Stories is a groundbreaking treatment resource for trauma-informed therapists who work with abused and neglected children ages nine years and older as well as their caregivers. The classic edition includes a new preface from the author reflecting on changes in the field since the book's initial publication. The therapy stories are perfect accompaniments to evidence-based treatment approaches and provide the foundation for psychoeducation and intervention with the older elementary-aged child or early pre-teen. Therapists will also benefit from the inclusion of thorough guides for children and caregivers which illustrate trauma and developmental concepts in easy-to-understand terms. The psychoeducational material in the guides, written at a third to fourth grade reading level, may be used within any trauma-informed therapy model in the therapy office or sent home for follow-up. Each therapy story illustrates trauma concepts, guides trauma narrative and cognitive restructuring work, and illuminates caregiver blind spots. The caregiver stories target issues that often become barriers to family trauma recovery. No therapist who works with young trauma survivors will want to be without this book, and school-based professionals, social workers, psychologists, and others committed to working with traumatized children will find the book chock-full of game-changing ideas for their practice.
