My Zoo:

Life at the Zoo Phillip T. Robinson, 2007 Based on 15 years of work at the world famous San Diego Zoo this charming book is an eminent zoo veterinarians personal account of the challenges hazards and rewards of running a modern zoo

American Zoo David Grazian, 2017-12-05 A close up look at the contradictions and wonders of the modern zoo Orangutans swing from Kevlar lined fire hoses Giraffes feast on celebratory birthday cakes topped with carrots instead of candles Hi tech dinosaur robots growl among steel trees while owls watch animated cartoons on old television sets In American Zoo sociologist David Grazian takes us on a safari through the contemporary zoo alive with its many contradictions and strange wonders Trading in his tweed jacket for a zoo uniform and a pair of muddy work boots Grazian introduces us to zookeepers and animal rights activists parents and toddlers and the other human primates that make up the zoo's social world He shows that in a major shift away from their unfortunate pasts American zoos today emphasize naturalistic exhibits teeming with lush and immersive landscapes breeding programs for endangered animals and enrichment activities for their captive creatures In doing so zoos blur the imaginary boundaries we regularly use to separate culture from nature humans from animals and civilization from the wild At the same time zoos manage a wilderness of competing priorities animal care education scientific research and recreation all while attempting to serve as centers for conservation in the wake of the current environmental and climate change crisis The world of the zoo reflects how we project our own prejudices and desires onto the animal kingdom and invest nature with meaning and sentiment A revealing portrayal of comic animals delighted children and feisty zookeepers American Zoo is a remarkable close up exploration of a classic cultural attraction

Why Do We Go to the Zoo? Erik A. Garrett, 2013-12-05 Despite hundreds of millions of visitors each year zoos have remained outside of the realm of philosophical analysis This lack of theoretical examination is interesting considering the paradoxical position within which a zoo is situated being a space of animal confinement as well as a site that provides valuable tools for species conservation public education and entertainment Why Do We Go to the Zoo argues that the zoo is a legitimate space of academic inquiry The modes of communication taking place at the zoo that keep drawing us back time and time again beg for a careful investigation In this book the meaning of the zoo as communicative space is explored This book relies on the phenomenological method from Edmund Husserl and a rhetorical approach to examine the interaction between people and animals in the zoo space Phenomenology the philosophy of examining the engaged everyday lived experience is a natural method to use in the project Despite its rich history and tradition it is interesting that there are very few books explaining how to do phenomenology Why Do We Go to the Zoo provides a detailed account of how to actually conduct a phenomenological analysis The author spent thousands of hours in zoos watching people and animals interact as well as talking with people both formally and informally This book asks readers to bracket their preconceptions of what goes on in the zoo and instead to explore the meaning of powerful zoo experiences while reminding us of the troubled history of zoos

Zoo Studies Tracy McDonald, Daniel Vandersommers, 2019-06-19 Do both the zoo and the mental hospital induce psychosis as humans are treated as animals and animals are treated as humans How have we looked at animals in the past and how do we look at them today How have zoos presented themselves and their purpose over time In response to the emergence of environmental and animal studies anthropologists sociologists philosophers theorists literature scholars and historians around the world have begun to explore the significance of zoological parks past and present Zoo Studies considers the modern zoo from a range of approaches and disciplines united in a desire to blur the boundaries between human and nonhuman animals The volume begins with an account of the first modern mental hospital La Salpêtrière established in 1656 and the first panoptical zoo the menagerie at Versailles created in 1662 by the same royal architect the final chapter presents a choreographic performance that imagines the Toronto Zoo as a place where the human body can be inspired by animal bodies From beginning to end through interdisciplinary collaboration this volume decentres the human subject and offers alternative ways of thinking about zoos and their inhabitants This collection immerses readers in the lives of animals and their experiences of captivity and asks us to reflect on our own assumptions about both humans and animals An original and groundbreaking work Zoo Studies will change the way readers see nonhuman animals and themselves
